1 E-Learning Content Authoring Tool

LectureMAKER is E-Learning content authoring software which empowers anyone to create interactive lessons and activities that can be easily delivered in various ways based on the deployment requirements.

With LectureMAKER subject matter experts or instructors can share their knowledge and expertise by developing and distributing a highly interactive, persuasive material.

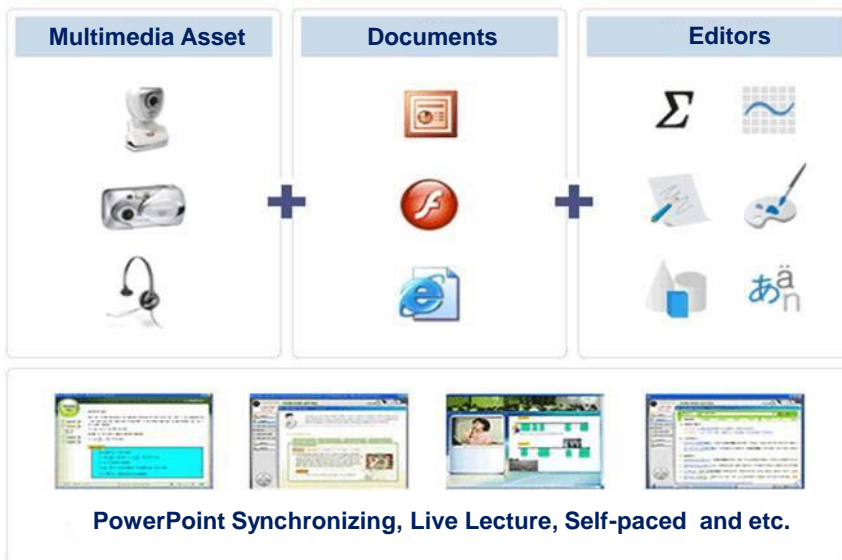

It allows saving the content in the universally accepted Flash format and the output can be SCORM compliant.

2 Various Usages

Anyone who needs E-Learning Content by himself.

Teacher & professor in school, HRD manager in cooperation, researcher in Lab institution and etc.

3 Sample content in the real field

Starts LectureMAKER

Add New Slide

1. [Home] Tab - [New Slide]
2. Ctrl + M
3. Enter key when click the Slide List area
4. Click the new slide icon  at the bottom of the slide screen

Remarks

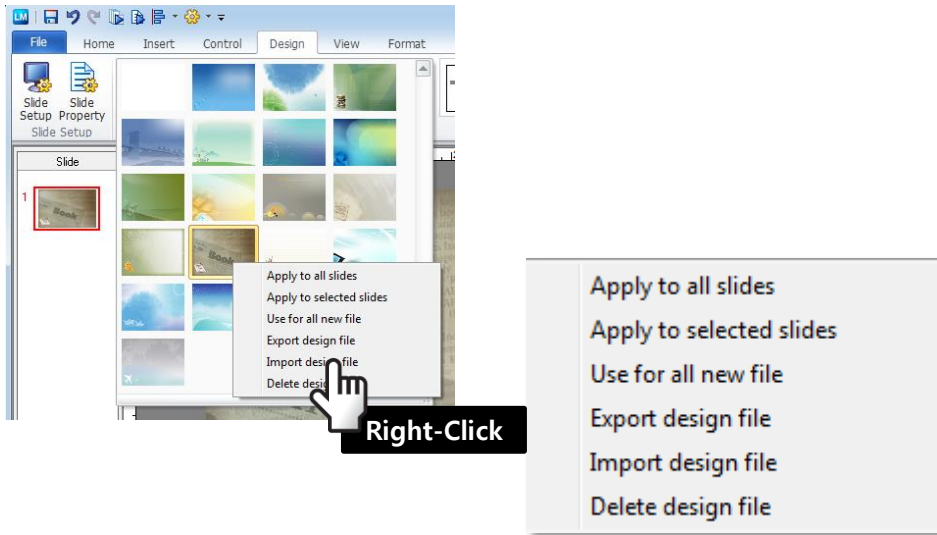

- Set the slide size before you author a lesson.
- [Design] Tab, click

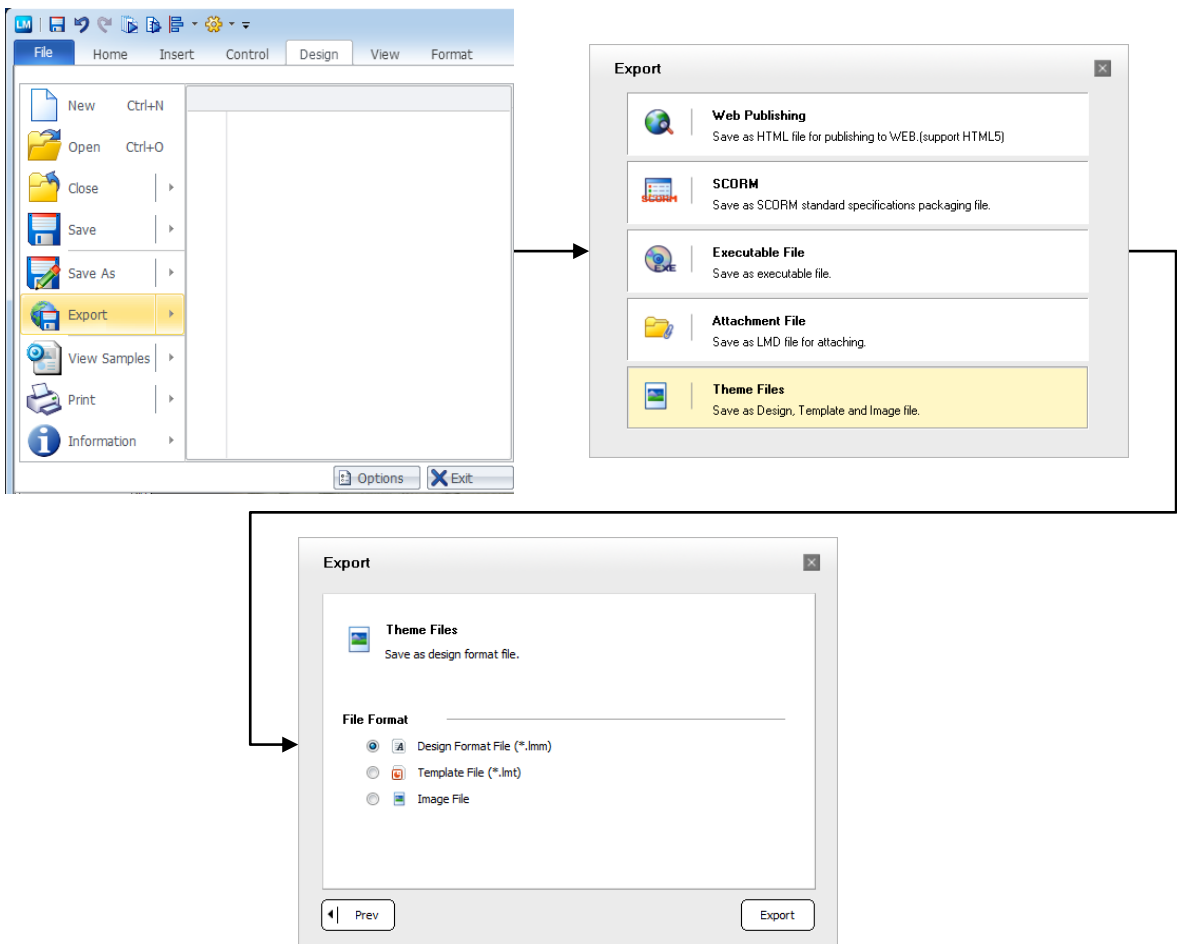

2 Slide Design

◆ Design

- base design offer in LectureMAKER, user can add design template directly.

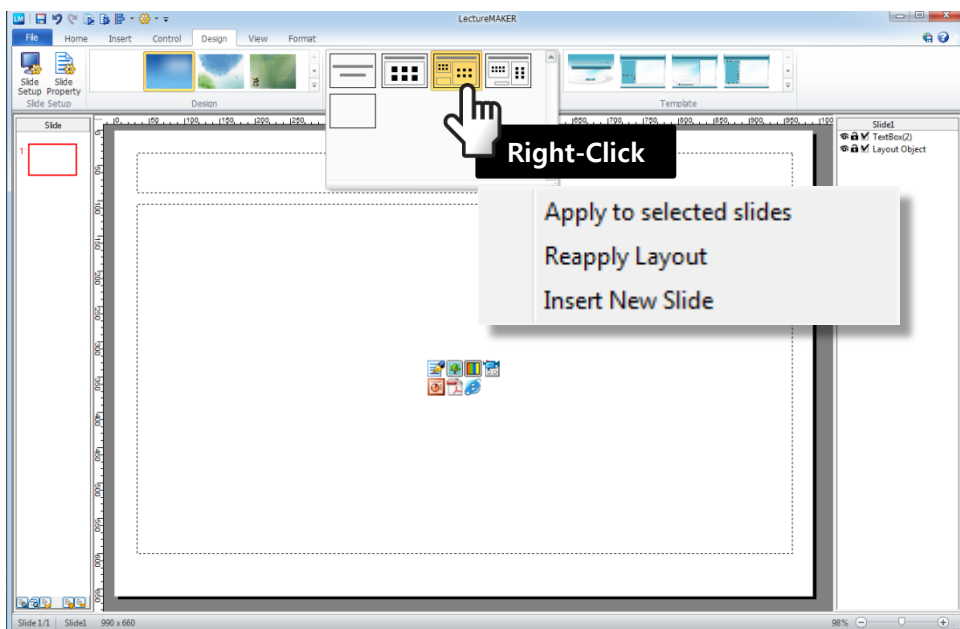

- User can save as Design format file, Template file, Image file via Export menu.

- Free download more designed images and updated templates from Daulsoft Product site.
- [www.daulsoft.com/en] – [Resource] – [LectureMAKER] – [Design]
- Download LectureMAKER Design file format [.*Imm]
- site url : www.daulsoft.com/en

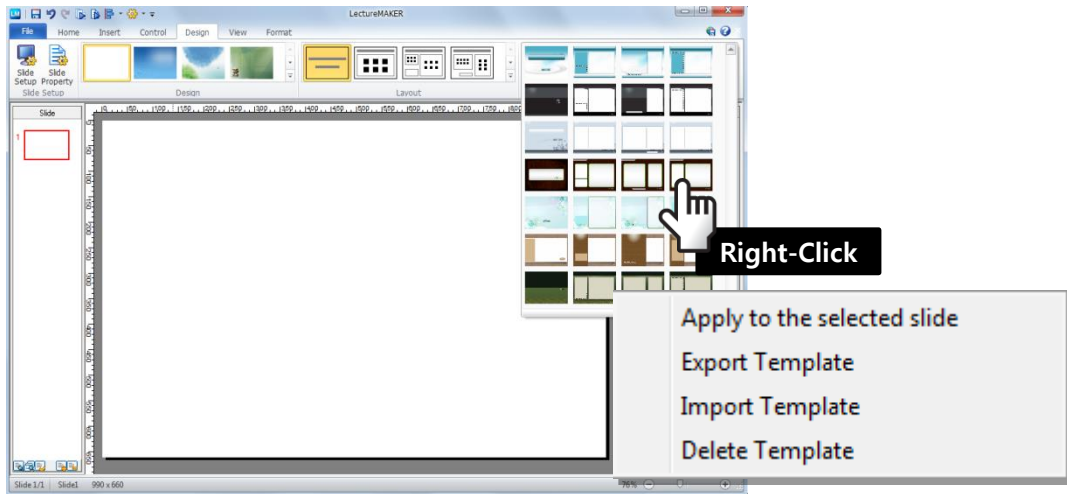

• Layout

- indicates the shape of an object placed in the slidework. There are 5 preset layouts.

◆ Template

- uses a preset template for design and layout.
- To use a template, select the Design tab. Select Template Group. There are 7 set, 28 templates. Choose the template. The template is inserted into the master slide.

◆ Slide Master

Controls the settings for the master slide, including font, format, background images, etc. There are Title Master and Body Master. Inserts Menu Button on Body Master, it appears all slides except first-intro slide.

if you do not want to adjust Slide Master, right mouse click on a slide and choose Property, [Slide Property] > checks Do not apply Slide Master to this slide.

Remarks

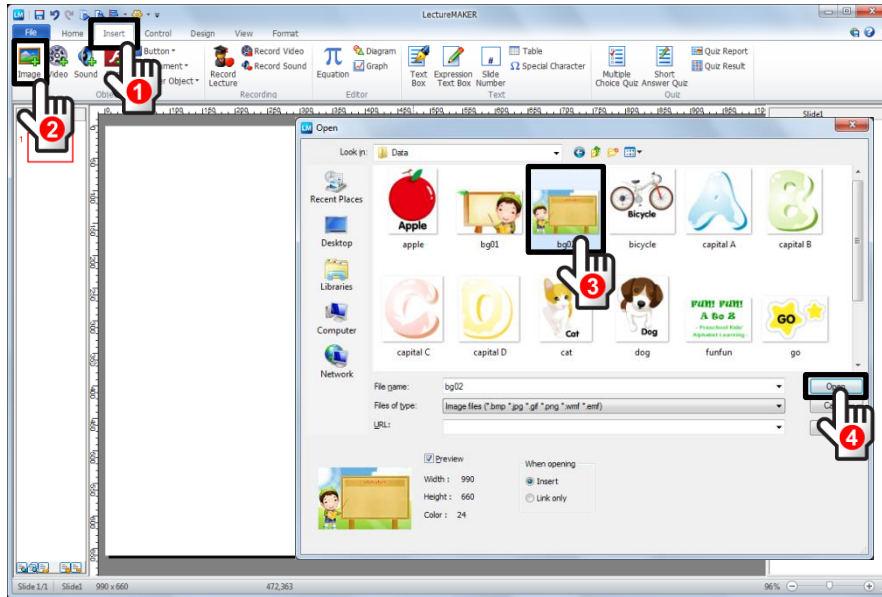

To view the master slide, select the View tab. Select View Master Slide. To end viewing of the master slide, click Close Master Slide.

3 Insert Various Multimedia Objects

◆ Insert Image

① To insert an image, select Insert tab. Select Object group and image icon. Select the image you want to open. Click Open.

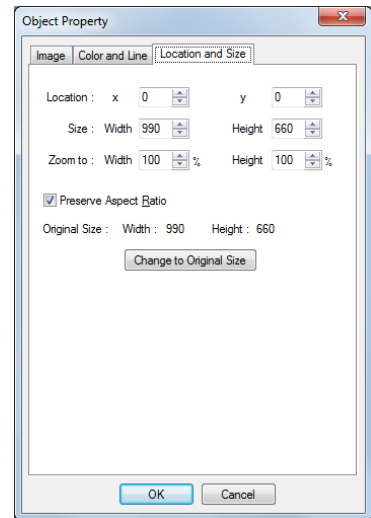

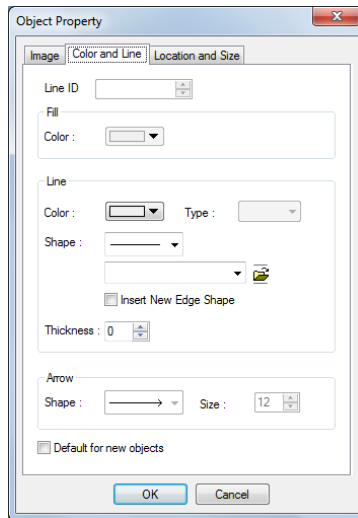

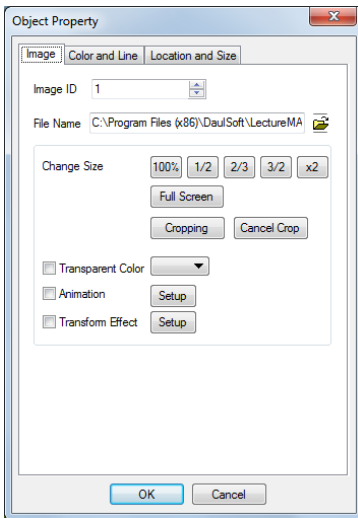

② The selected image was inserted.

- To modify the image properties, use the Format tab. To activate the Format tab, double-click on the image.

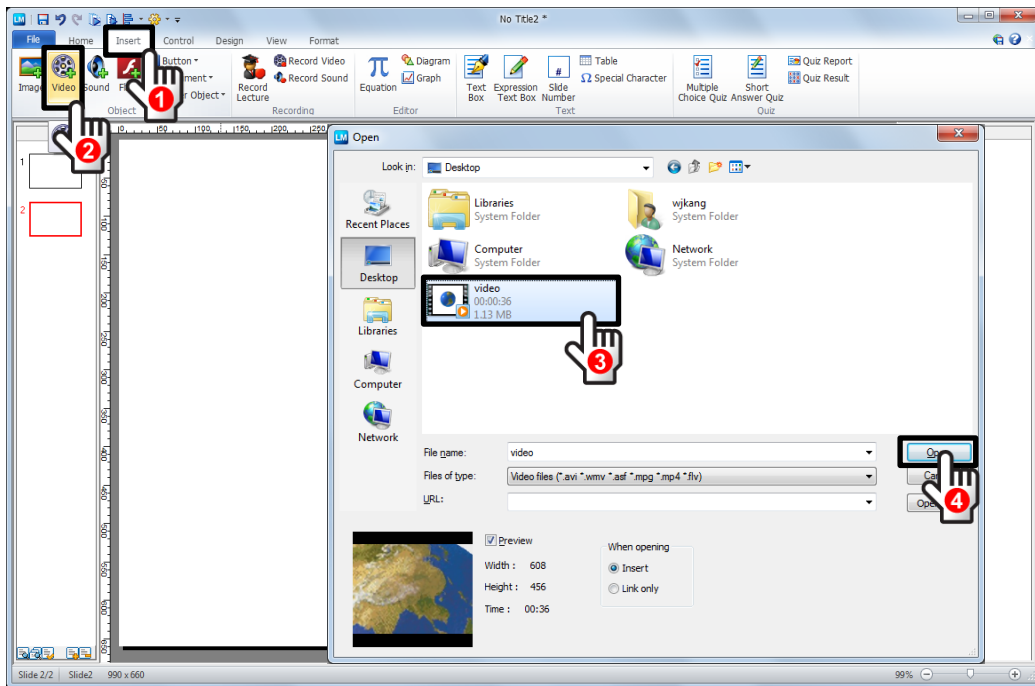

- To edit the picture, right-click the image and select Edit Image. Use the Image edit tool.
- Right-click and open Object Property.

◆ Insert Video

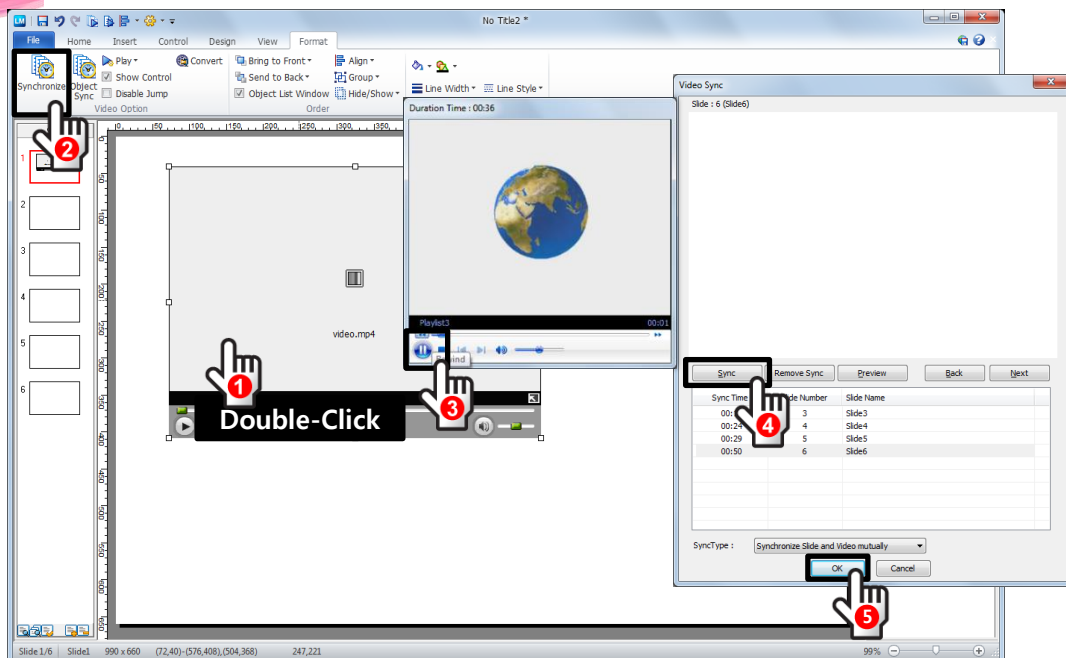

- ① To insert a video file, select the Insert tab. Select Video. Select the file to open. Click Open.

- ② The selected video was inserted.

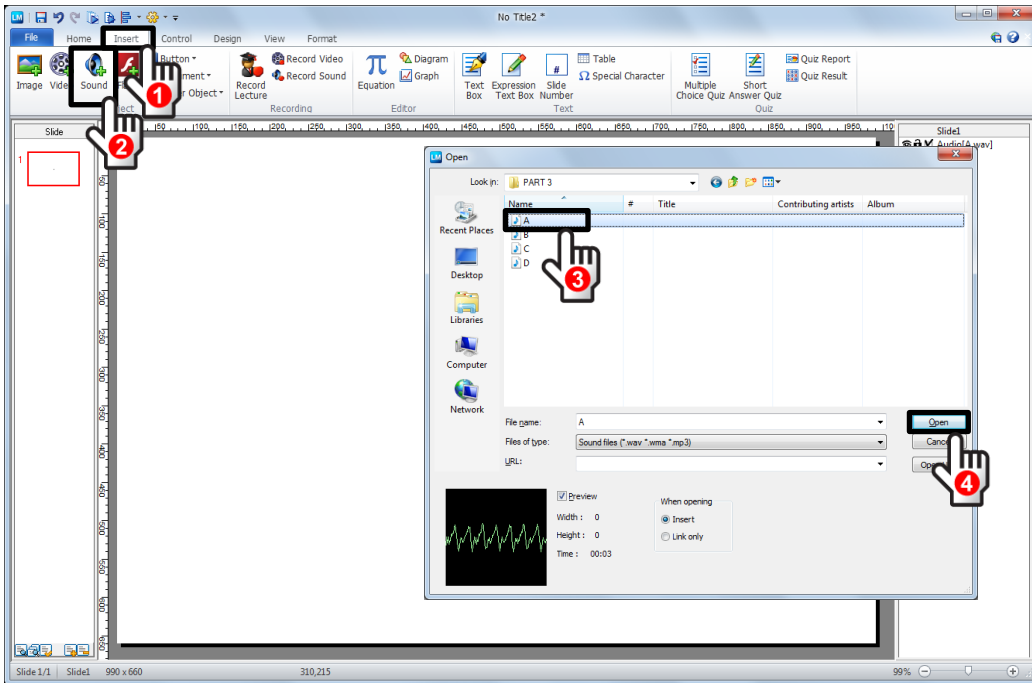

Synchronization

- ▶ Double click to video, and click Synchronize Menu.
- ▶ Click video play button, the sync button will make a sync with slide at that time.
- ▶ Click to OK button when finished to sync.
- ▶ The Synch time can be input directly.
- ❖ The Synch time must be filled every entry and ascending order.

● Insert Sound

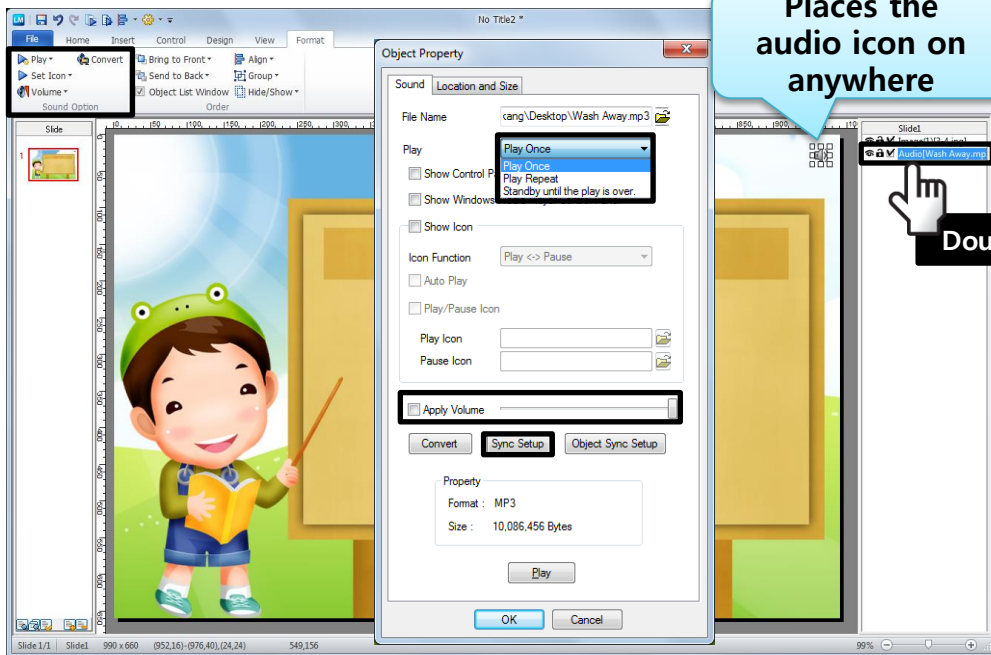

① To insert an audio file, select the Insert tab. Select Sound. Select the file to open. Click Open.

② The selected sound was inserted.

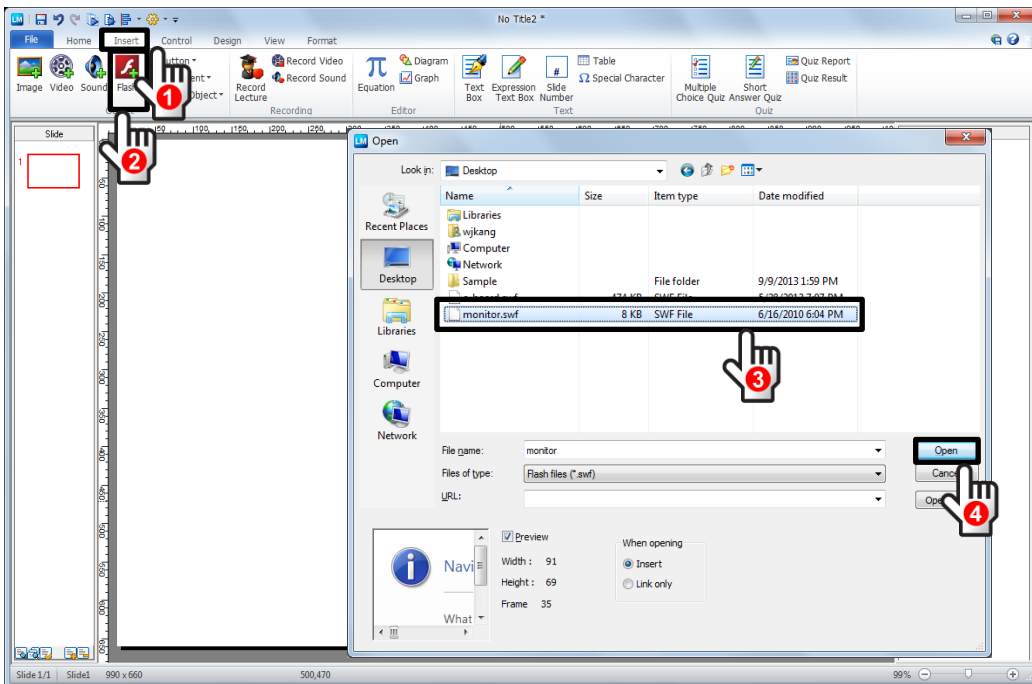

Audio file property

- ▶ Play : chooses the repetition.
- ▶ Volume : controls the audio volume.
- ▶ Synch Setup : Synchronizes Audio file and slides.

● Insert Flash

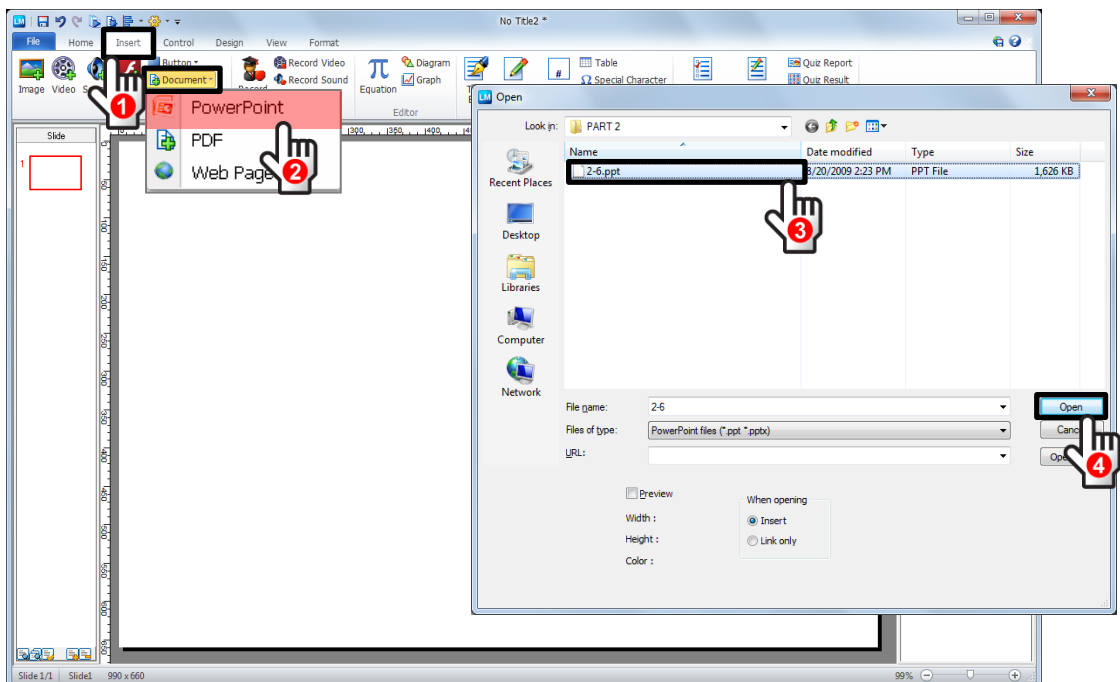

① To insert a flash file, select the Insert tab. Select Flash. Select the file to open. Flash files must be in *.swf movie format. Click Open.

② The selected flash file was inserted.
※ Properties window feature in Flash object is not used .

● Insert Document(PowerPoint)

① To insert a PowerPoint file, select the Insert tab. Select Document and choose PowerPoint. The mouse pointer changes to cross shape(+). Place the cursor where you want the PowerPoint document to be inserted. Select the file to open. Click Open.

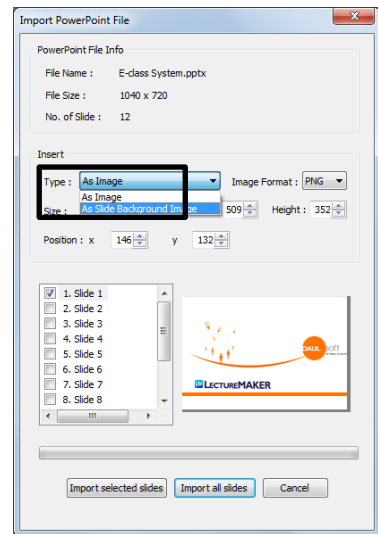

② The selected PPT file was inserted.
③ Object properties are the same as the web page.

Import PowerPoint

- ▶ As Image :
Powerpoint to be inserted in the form of a picture, you can choose Location, Size and Slide that user want.
✘ when insert, if you keep horizontal and vertical ratio, Text can be used to prevent breakage.
- ▶ As Slide Background Image :
PowerPoint will be inserted background image to LectureMAKER Slide.

>>As Image

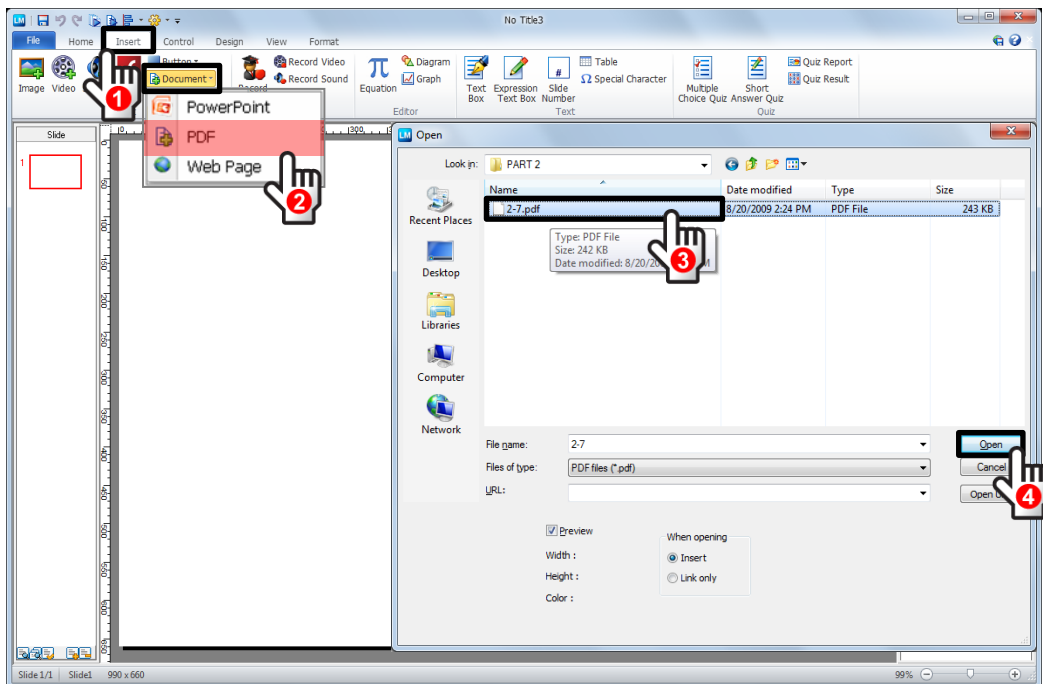

>>As Slide Background Image

◆ Insert PDF

① To insert a PDF document, select the Insert tab. Select Document and choose PDF. The mouse pointer changes to cross shape(+). Place the cursor where you want the PDF document to be inserted. Select the file to open. Click Open.

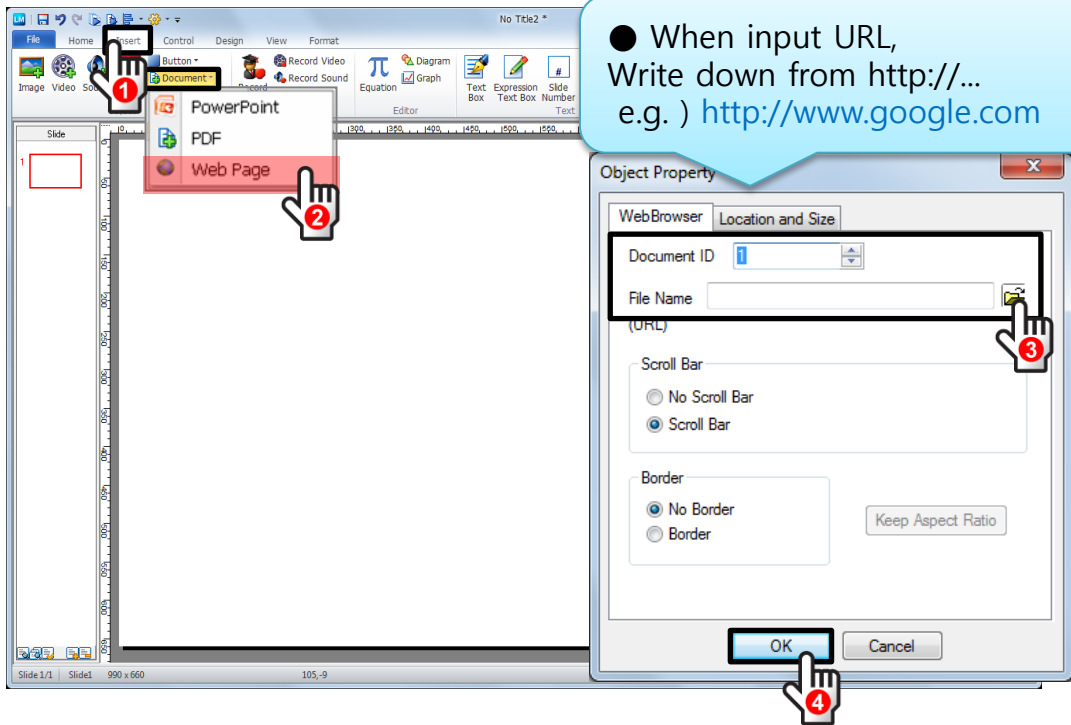

- ② The selected PDF file was inserted.
- ③ Object Property is same as Web browser's.

● Insert Web Page

① Website files are added as HTML tags.

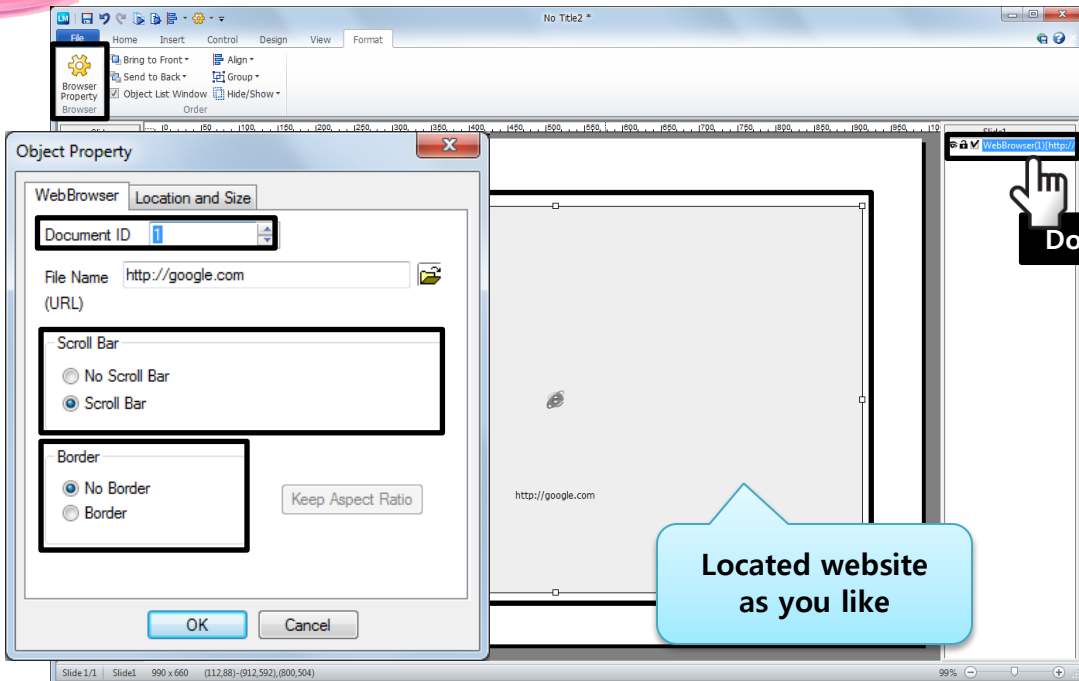

To insert an HTML file, select the Insert tab. Select Document and choose Web Page. The mouse pointer changes to cross shape(+). Place the cursor where you want the web browser to be inserted. Write a URL and click OK.

② Previews (by [View] Tab, shift+F5), the website is open.

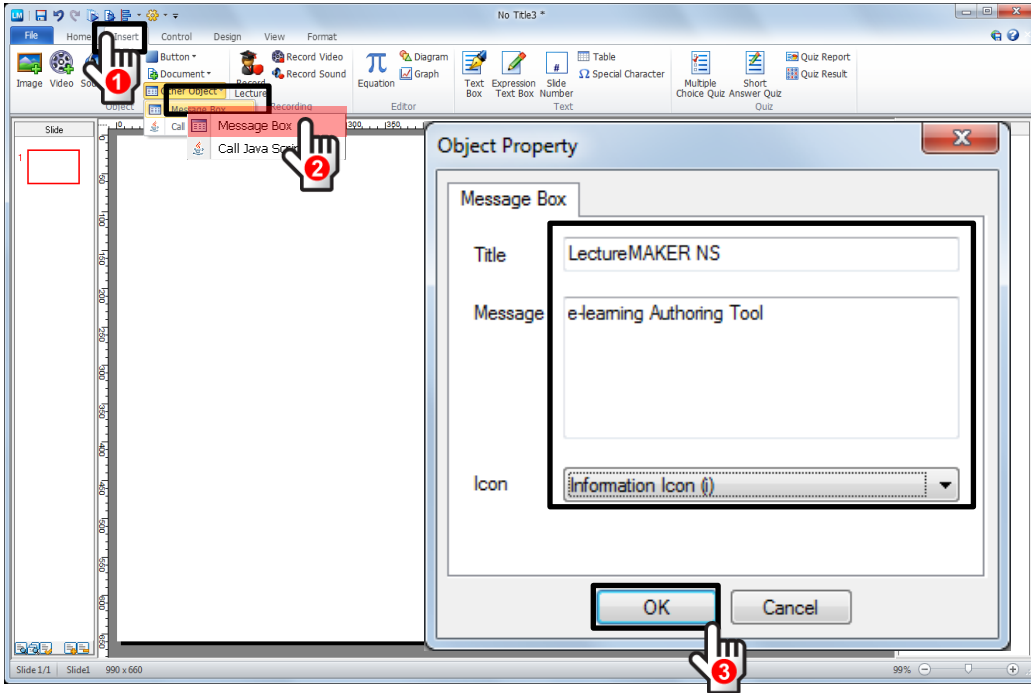

Document Property

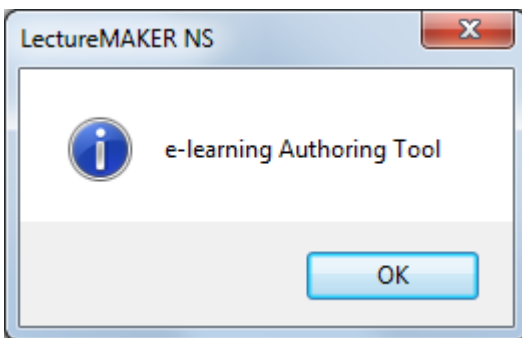

- ▶ Document ID : gives ID number for control each document asset.
- ▶ Scroll Bar : adjusts scroll bar to horizontal/ vertical side(s).
- ▶ Border : gives border design.

◆ Insert Other object(Message Box)

① To create a message box select the Insert tab. Select Other Object and choose Message Box. The Object Property window appears.

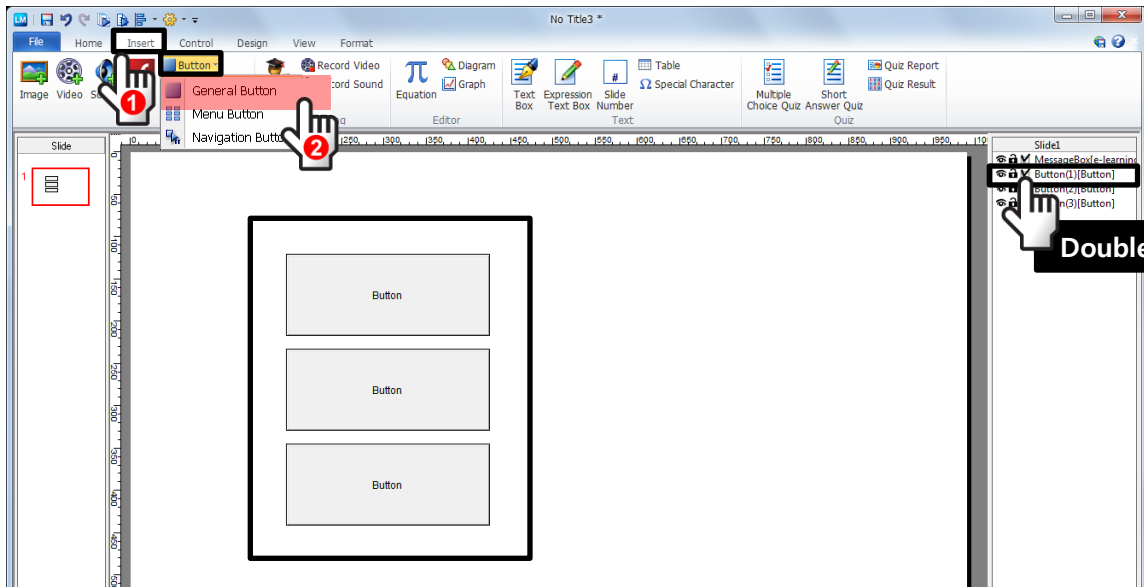

② Previews (by [View] Tab, shift+F5), the message box is open.

4 Buttons

◆ Insert General Button

① To insert a button, select the Insert tab. Select Button. The mouse pointer changes to cross shape (+). Place the cursor where you want the button to be inserted. Use the left mouse button to control the size of the button.

② To activate the Format tab, double-click on the object.

General Button Property

◆ Insert Sound

※ Insert a sound for flip effect when slide down, it is better to insert the flip sound on [Body Master] to apply it all slides.

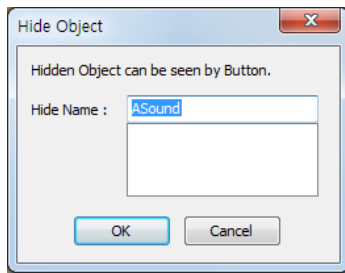

- ① [Slide Master] – [Body Master], click [Insert]Tab - [Sound].
choose sample audio file 'PART3\wbubblesound.wav' and click OK.

- ② back to [Slide] from slide master, insert each alphabet sound to slide 2 to 5.
slide 2–A.wav / slide 3–B.wav / slide 4–C.wav / slide 5–D.wav
- ③ the alphabet sound plays by button function, hide each alphabet sound.
right-click on the sound and choose Hide.

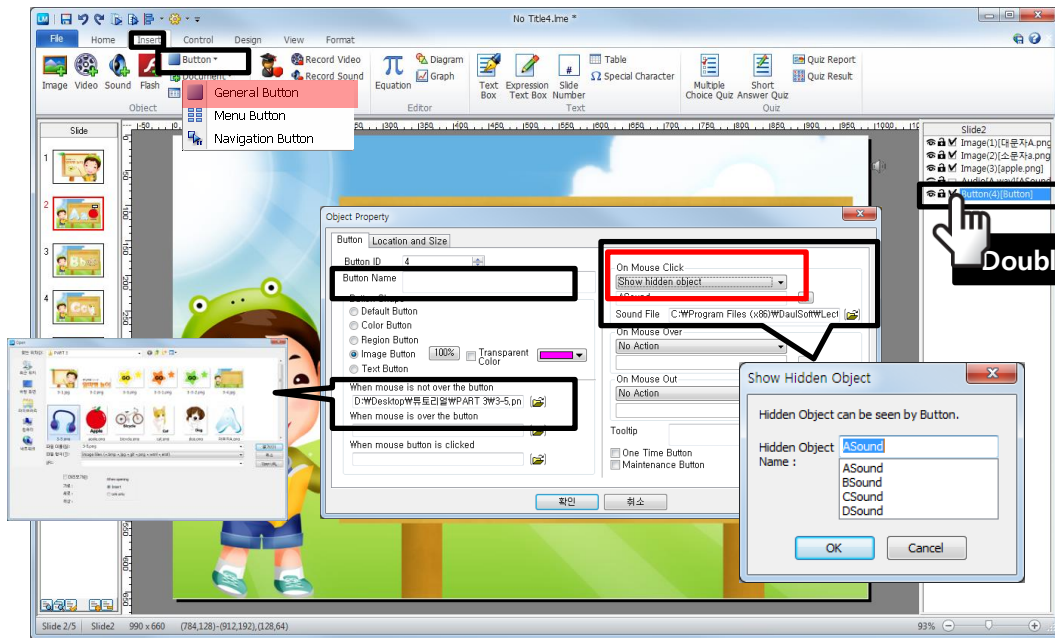

- ④ assigns a hidden name on the [Hide Object] and click OK.
- ⑤ hides the other audio objects in slide 3 to 5.

◆ Insert Button (Headphone image)

- ① chooses slide3, click [Insert]Tab - [Button]- [General Button]. Places cursor for button. Double-click the button object and [Format-Button] Tab is shown.

- ② deletes the button name and leaves it as blank, selects the button shape as Image Button, click [When the mouse is not over the button] and open sample image file PART3W3-5.png'.
- ③ on [When button is clicked], selects [show hidden object] and assigns a hidden object and OK.
- ④ when the button property set over, click OK.

◆ Insert Navigation Button

※ Insert navigation button on slide 1 to 5.

① on [Insert] Tab, click [Button]-[Navigation Button].

② chooses a button design and check the navigation type or click Select All/ Cancel All.

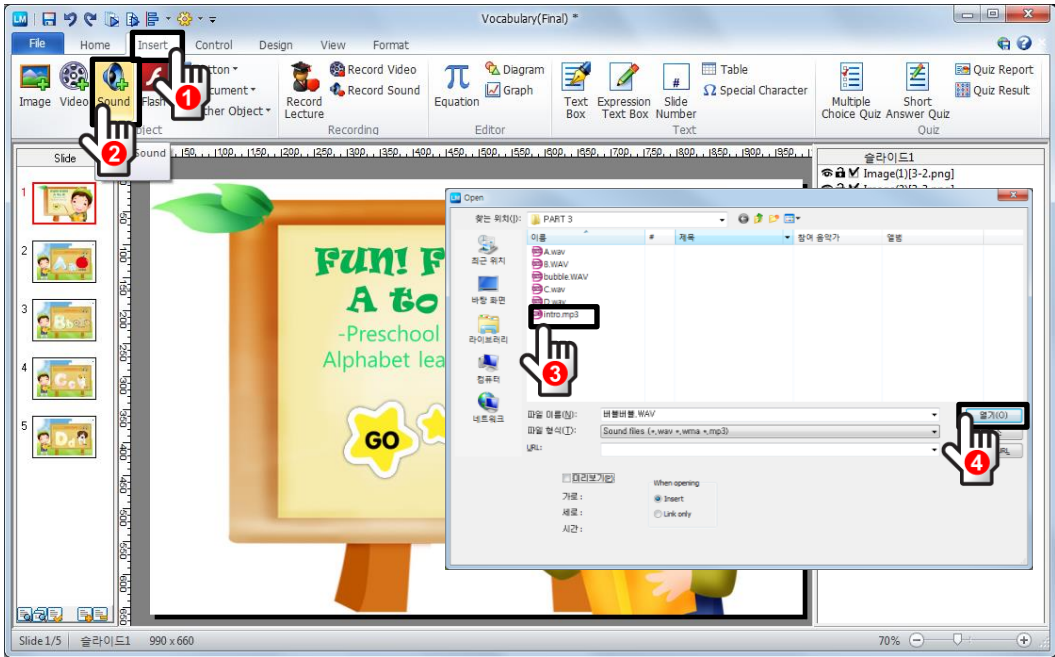

③ Click [Apply to all slides], the navigation button was inserted all slide 1 to 5.

④ Drag and place the button and then delete a set of button from particular slide. Change the button property by double-click it or right-click [Object Property].

◆ Intro Slide

※ Insert Intro sound on slide 1.

① on slide 1, click [Insert]Tab - [Sound]. Choose sample audio file 'PART3\intro.MID' and click OK.

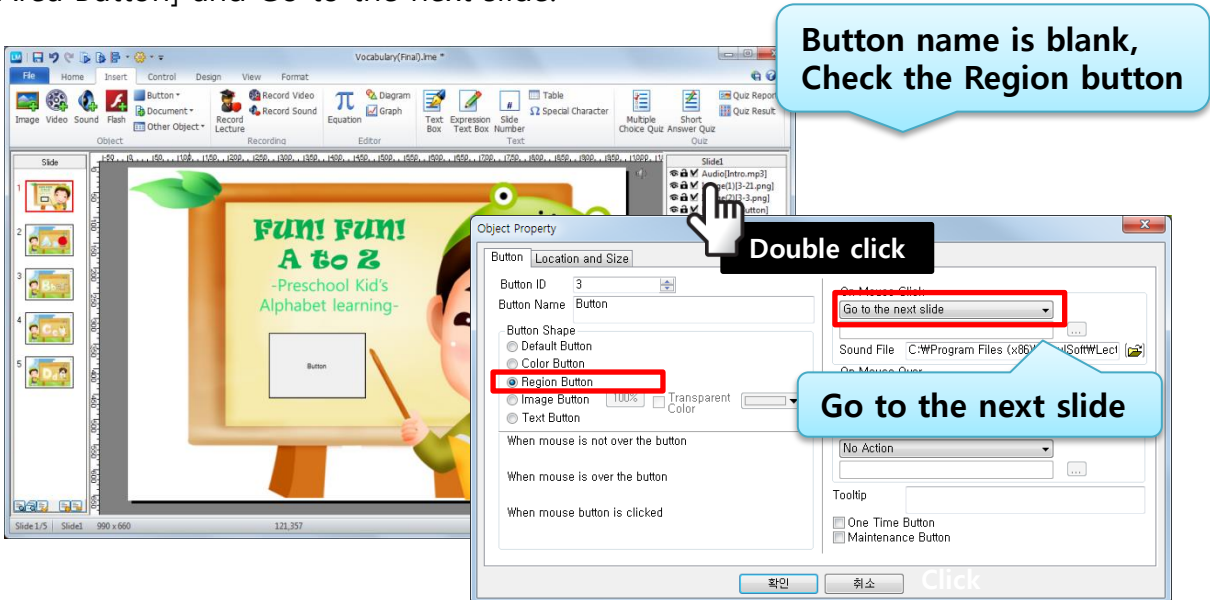

② For playing first the intro sound than any other object, change the object list order. Drag the Audio[Intro] to top.

Drag it.

③ Go image is start button for play the next slide. [Area Button] and Go to the next slide.

Preview

✂ for preview, click [View]Tab-[Run Web] and check the content.

Remarks

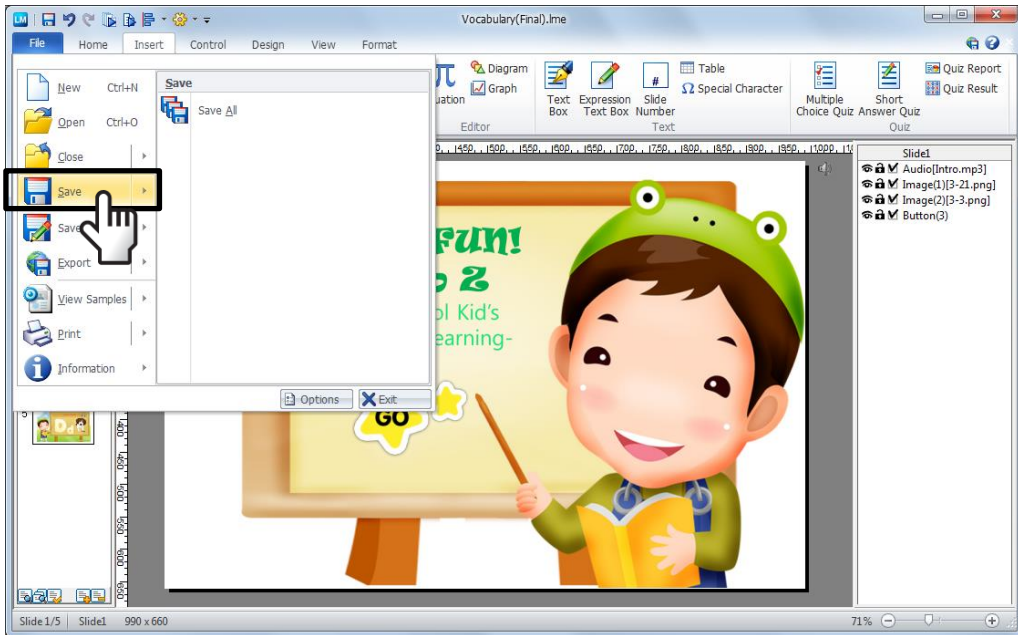

- Prohibit to proceed by slide click or enter key, change the slide property.
- [Design]Tab - [Slide Property] – Move to the next slide option,
 - ✓ Un-check When mouse or key is pressed
 - ✓ Check Apply to all slides

5 Save As

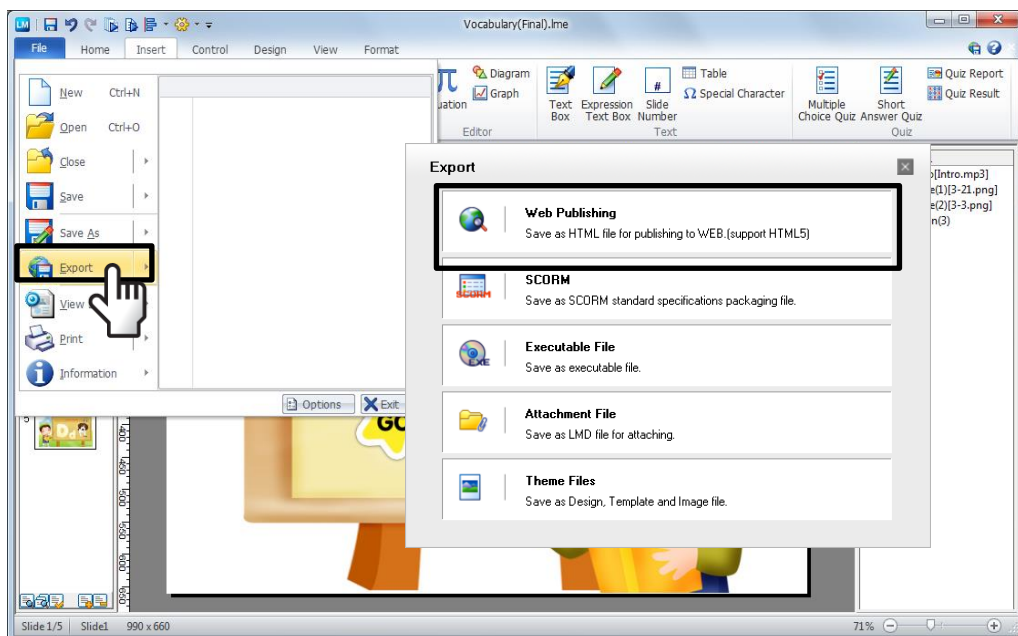

◆ Save

※ Save as *.lme (LectureMAKER original file format and editable format) and then Save As Web for web service.

◆ Export Web

※ [Export]-[Web Publishing] , choose file format as html5/LectureMAKER.

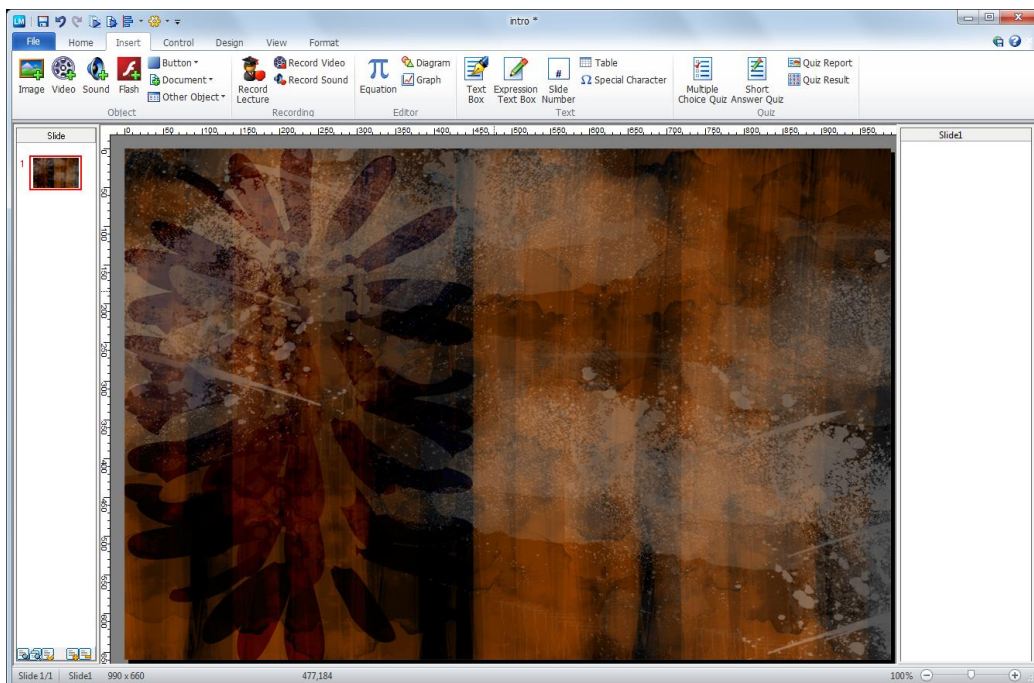

1 Open LectureMAKER

- ① Run LectureMAKER, click LectureMAKER button and click [File] sample content file 'PART4Wintro.lme'.

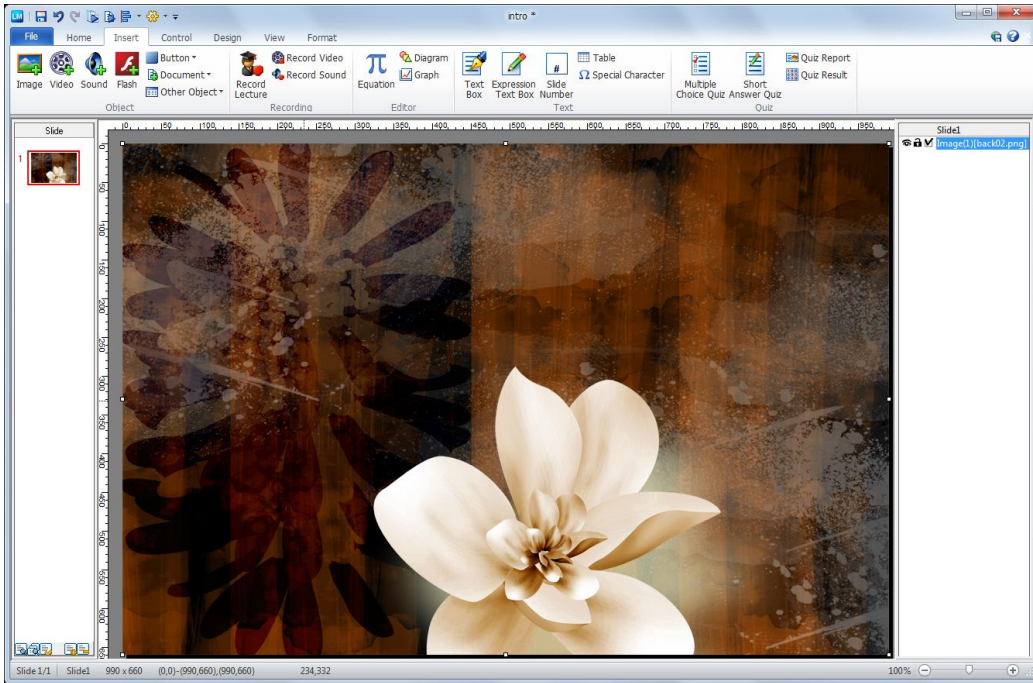

- ② the sample file was opened.
A image was inserted as slide background. (right-click and slide property)

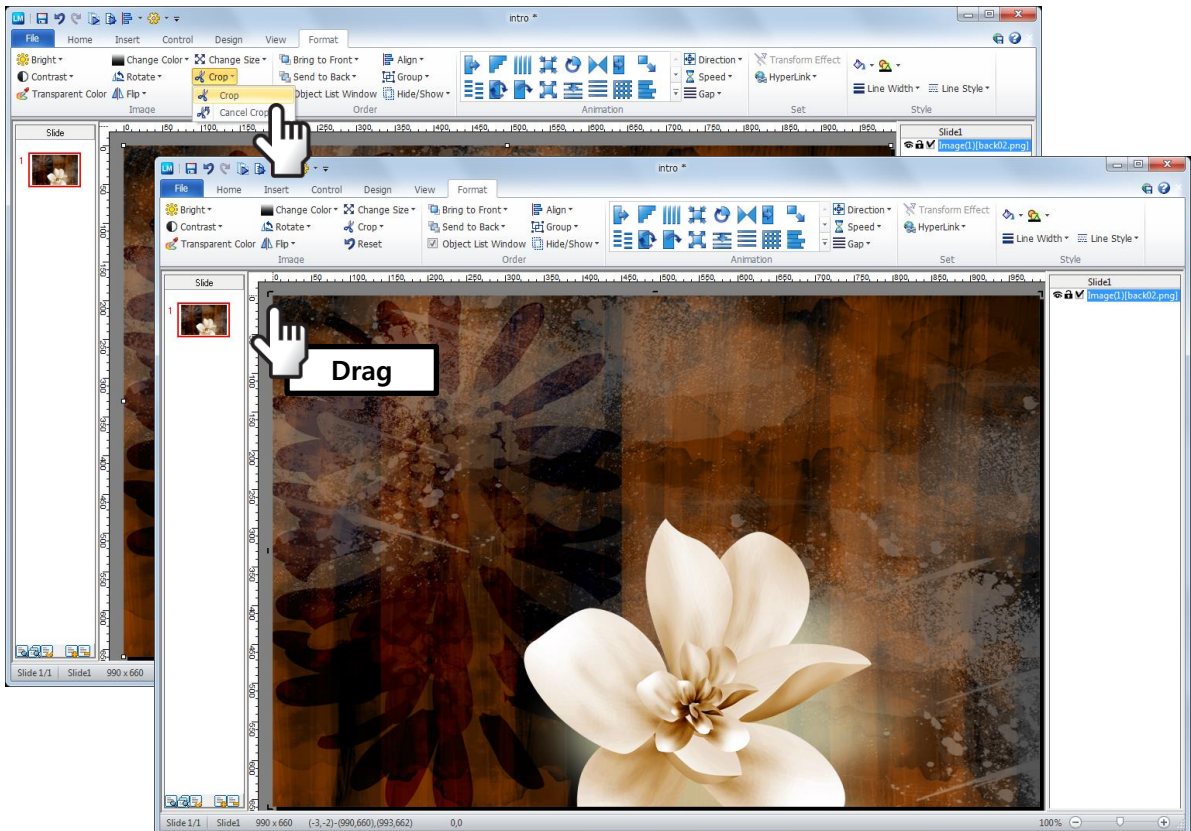

2 Insert Images & Pause

◆ Insert image and animation effect

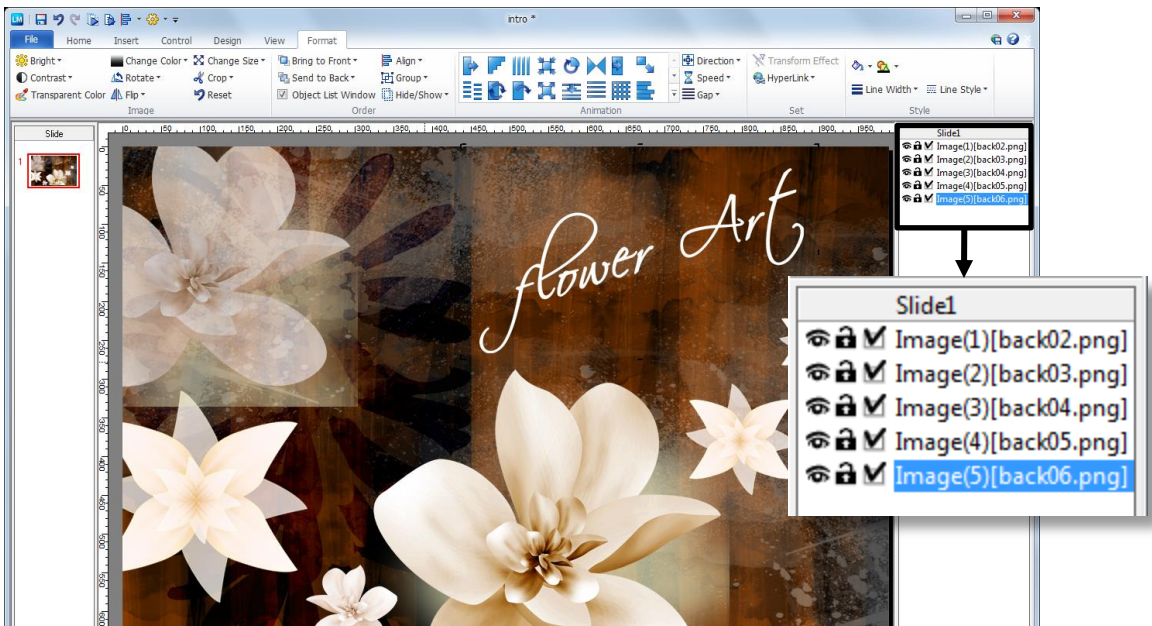

① [Insert]Tab - [Image], open "PART 4\back02.png".

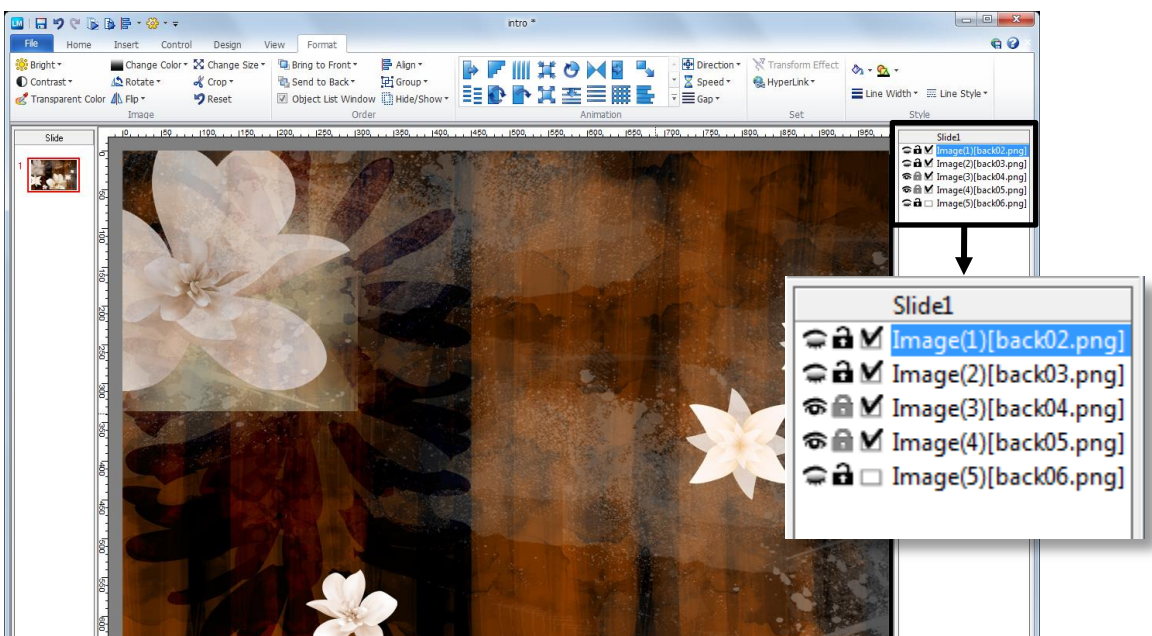

② double-click the image, [Format] Tab –Crop. Crop the images blank space.

③ Insert the other images as below object list order and crop the each blank space.

④ Add animation effect to each inserted image. double-click the image and click [Format]Tab - [Animation].

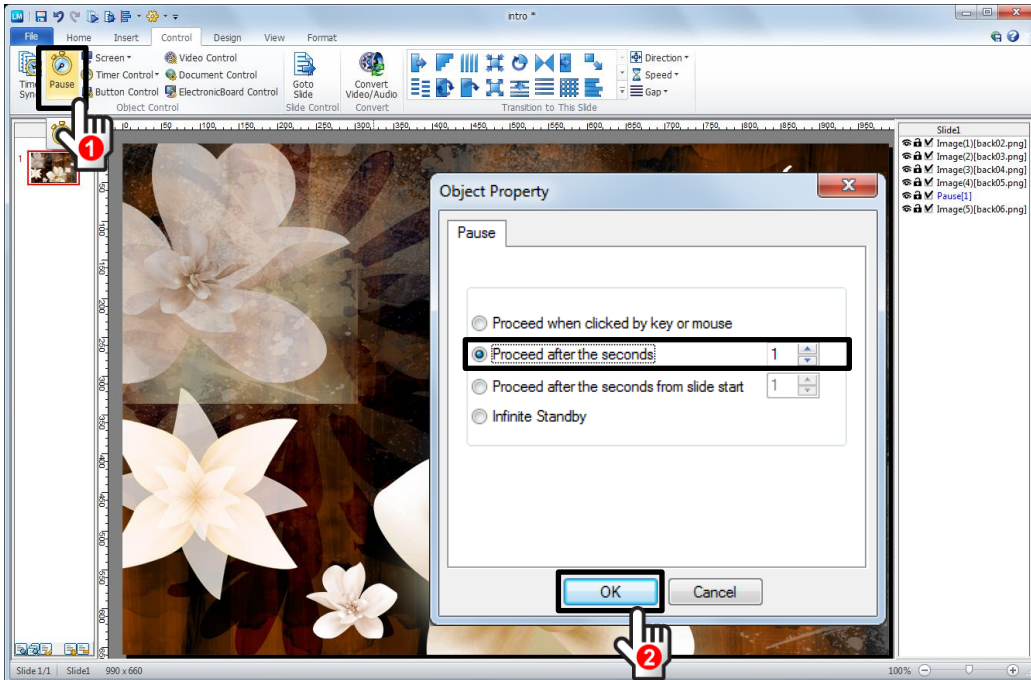

Remarks

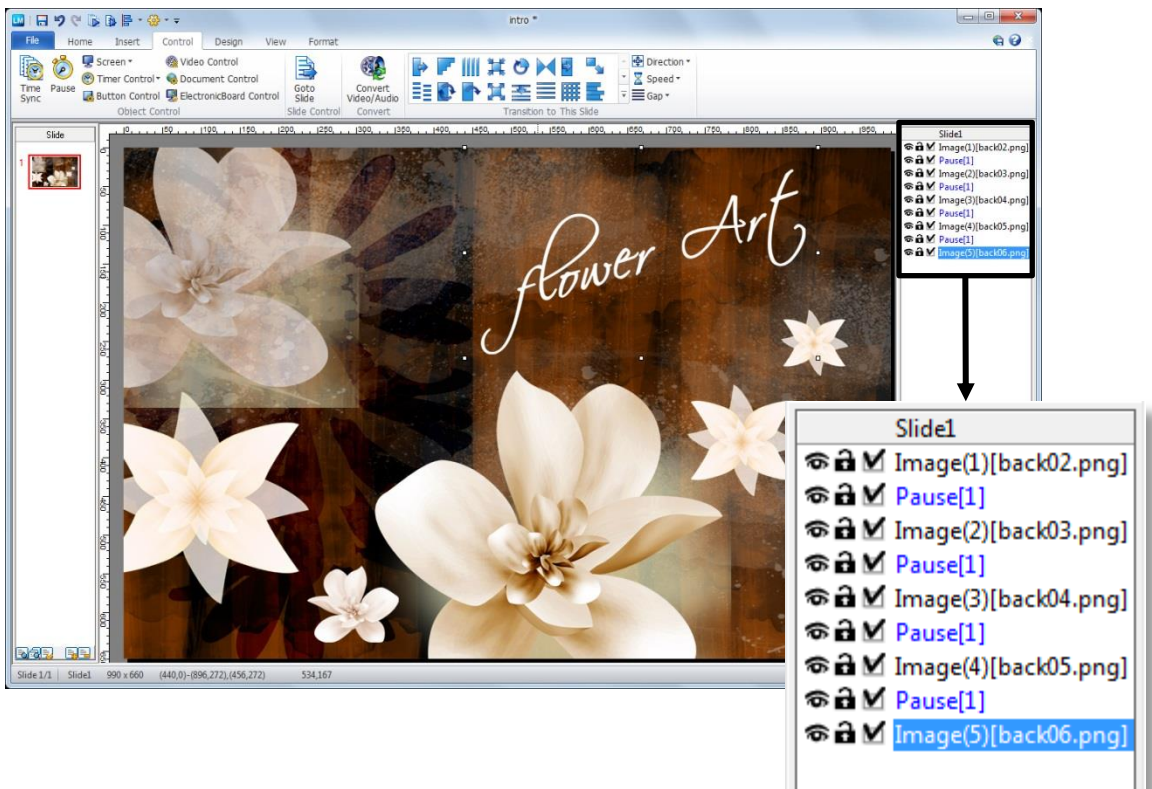

- Due to the duplicate object when the object difficult to select an object in the list, click the eye or the lock can be selected by clicking on.
 - Eyes: hide objects invisible
 - Lock: locks the object so that you can select
 - Check Box: Select the object is unavailable.

◆ Insert Pause

① To play animation effect with delayed proceed, insert Pause between each object. Click [Control]Tab - [Pause], give 1 or 2 seconds on Proceed after the seconds.

② Insert Pause between the objects.

3 Insert BGM and Narration

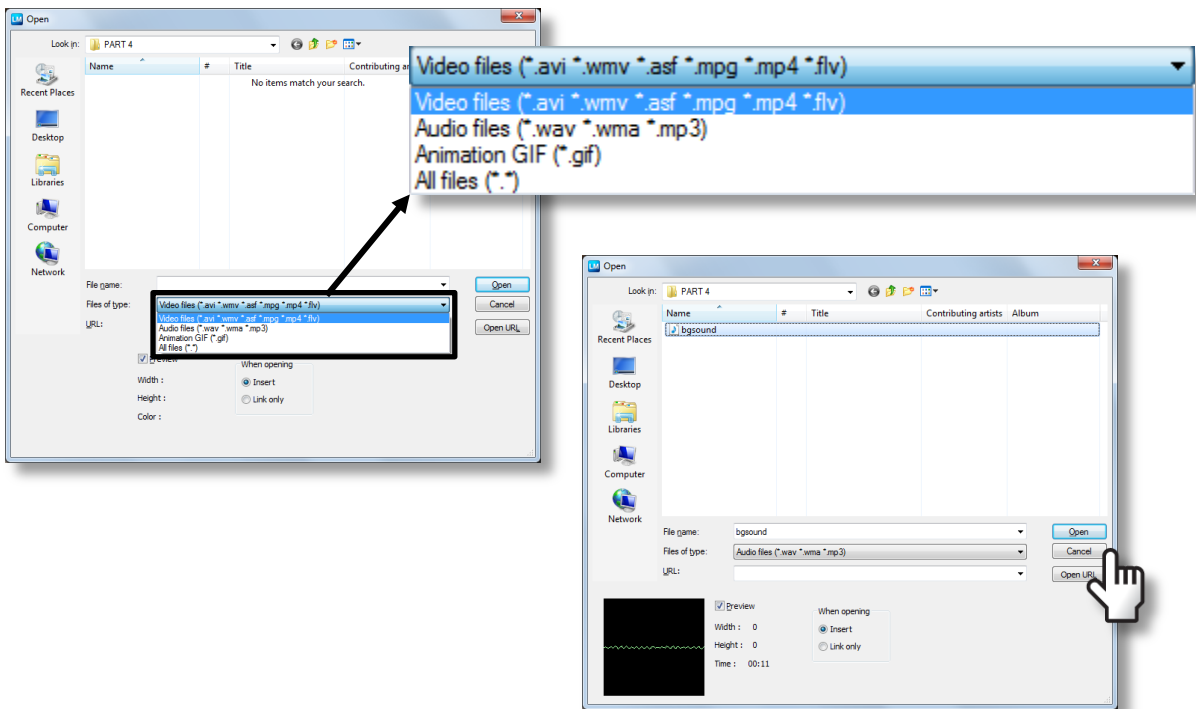

◆ Insert BGM

① insert audio file by [Insert]Tab - [Video].

Remarks

• When inserting more than 2 audio files(BGM and narration), insert BGM audio file by Video object.

② choose file format as 'Audio files' and insert sample audio file PART 4\bgsound.wav .

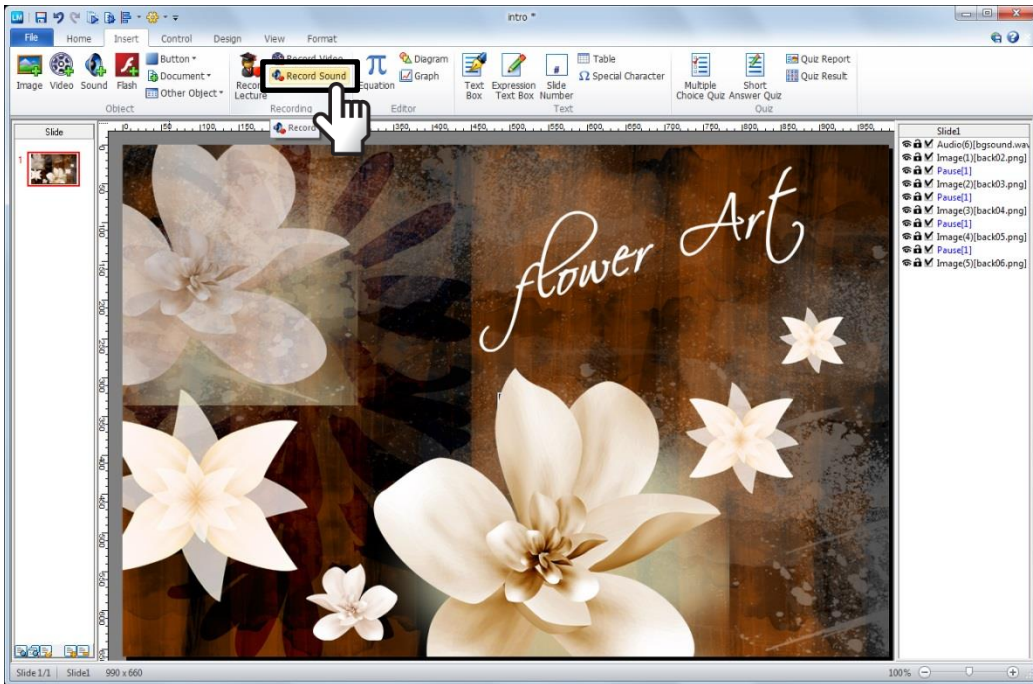

③ the audio file was inserted as video object.

④ drag the audio file to top of the list.

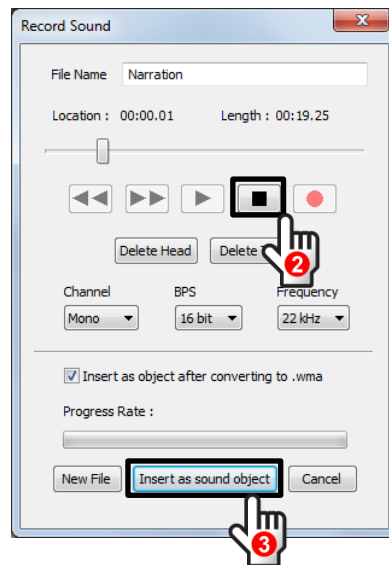

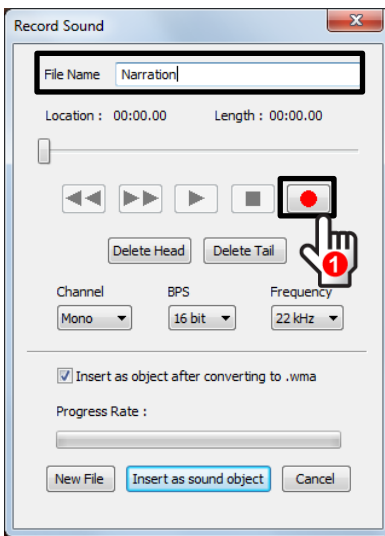

Record Narration

- record narrative using Record Sound.
click [Insert] - [Record Sound].

- enter file name and click the record icon.
after recording over, click Stop icon, click [Insert as sound object].

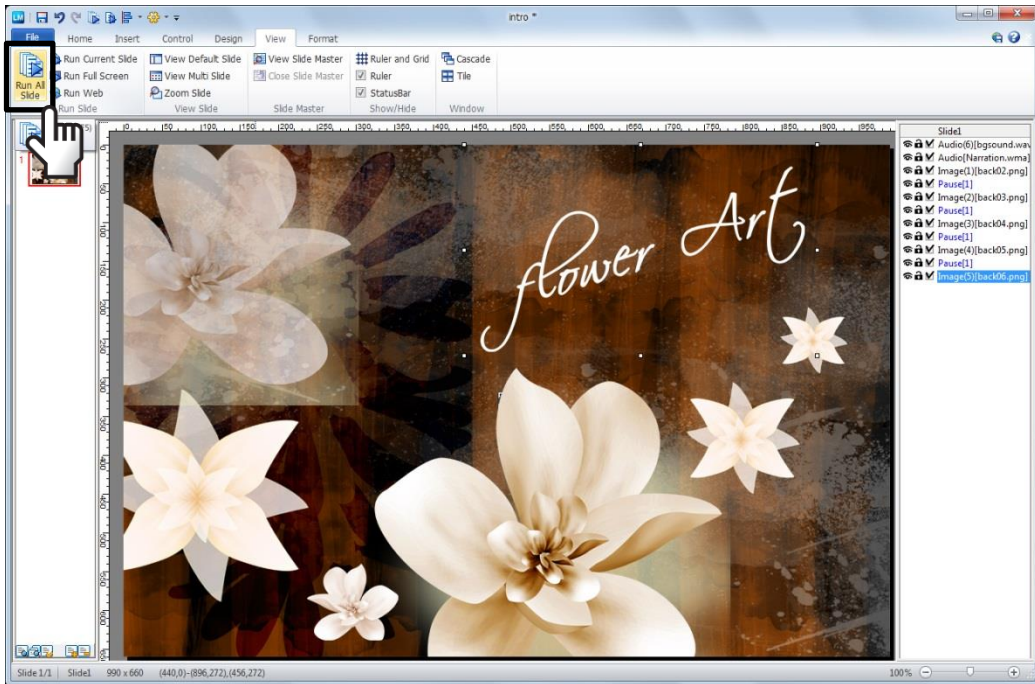

- the audio file was inserted.
drag and move it next to the BGM audio file.

4 Preview & Save

Preview

- ① [View]Tab - [Run All Slide], check the content

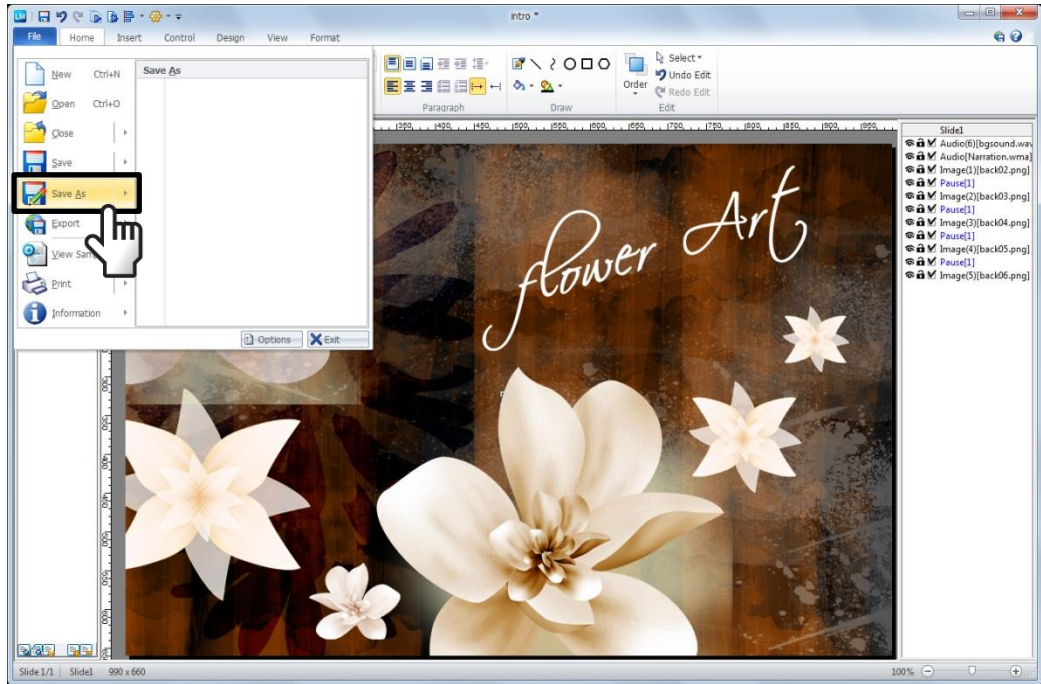

- ② run Preview window (F5 / shift+F5)

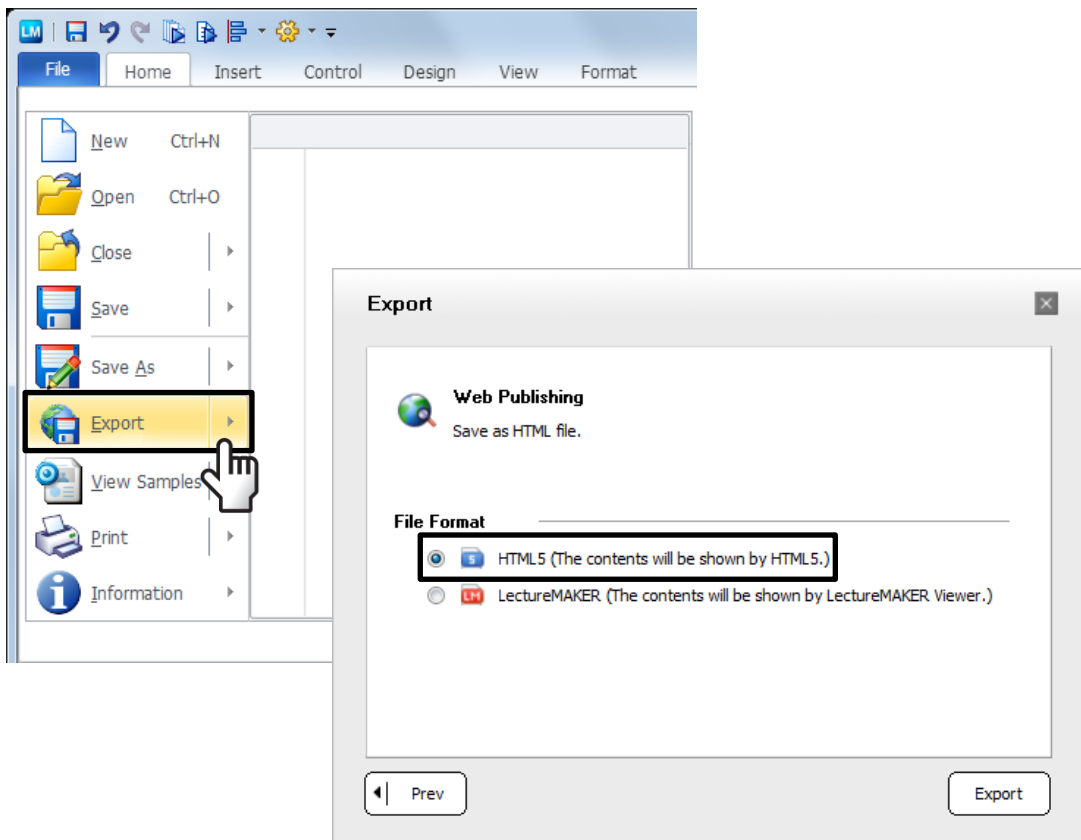

Save

- 1 Click [File] tab, choose [Save As].

- 2 Click [File] tab, [Export]-[Web Publishing] and html5 format.

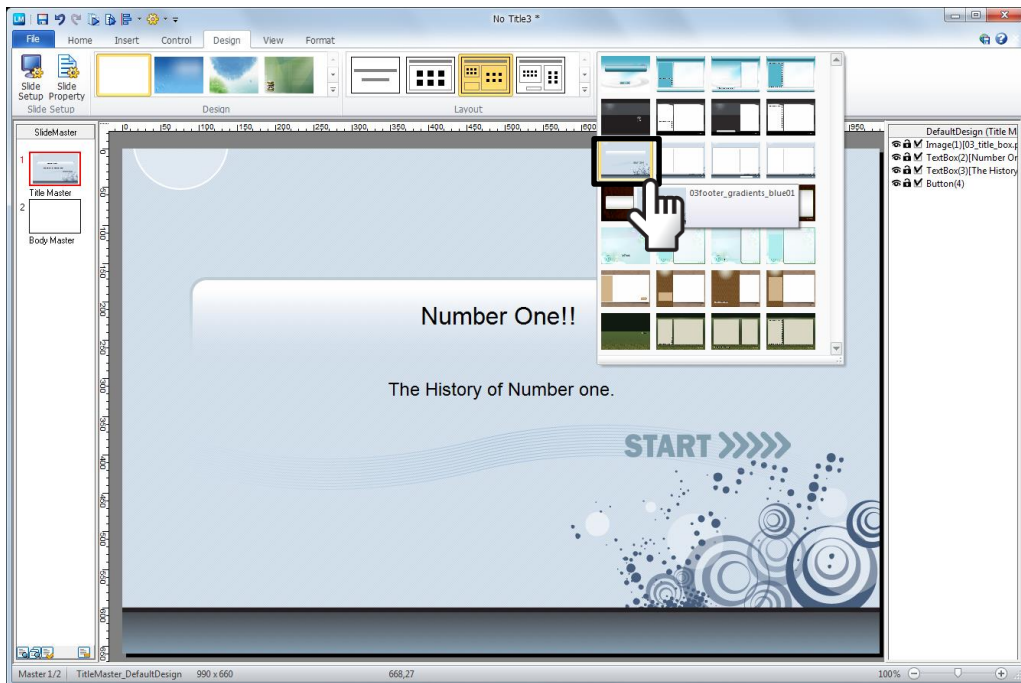

1 Add Template on Slide Master

- ① Run LectureMAKER, click and switch to [Slide] to [Slide Master]

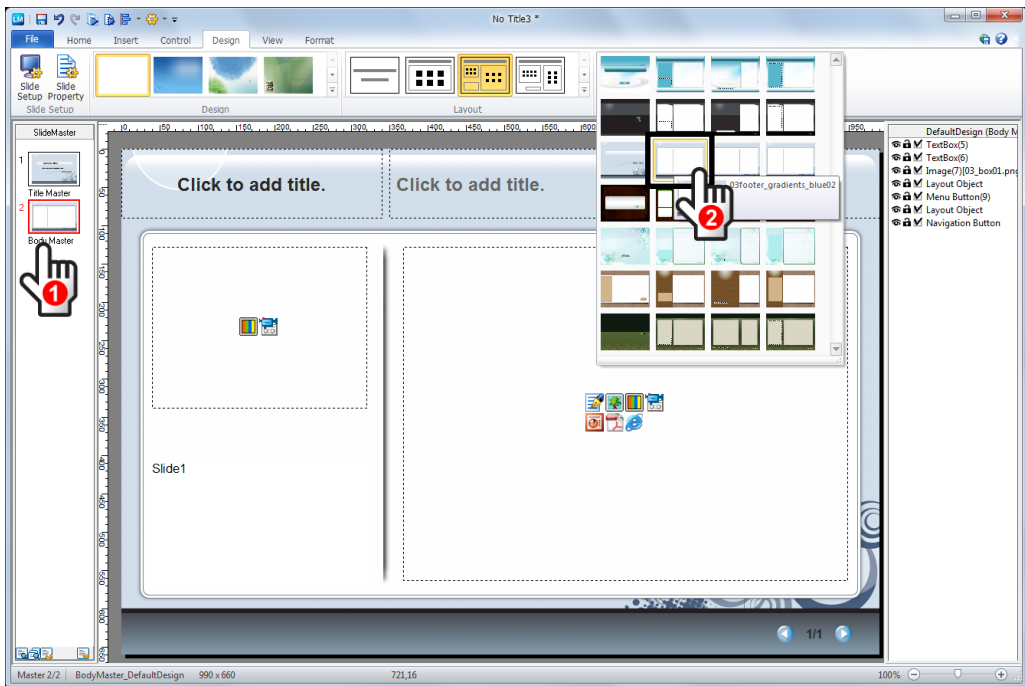

- ② Add each template to [Title Master] and [Body Master].
on **[Title Master]**, add title master design and enter title and subtitle text.

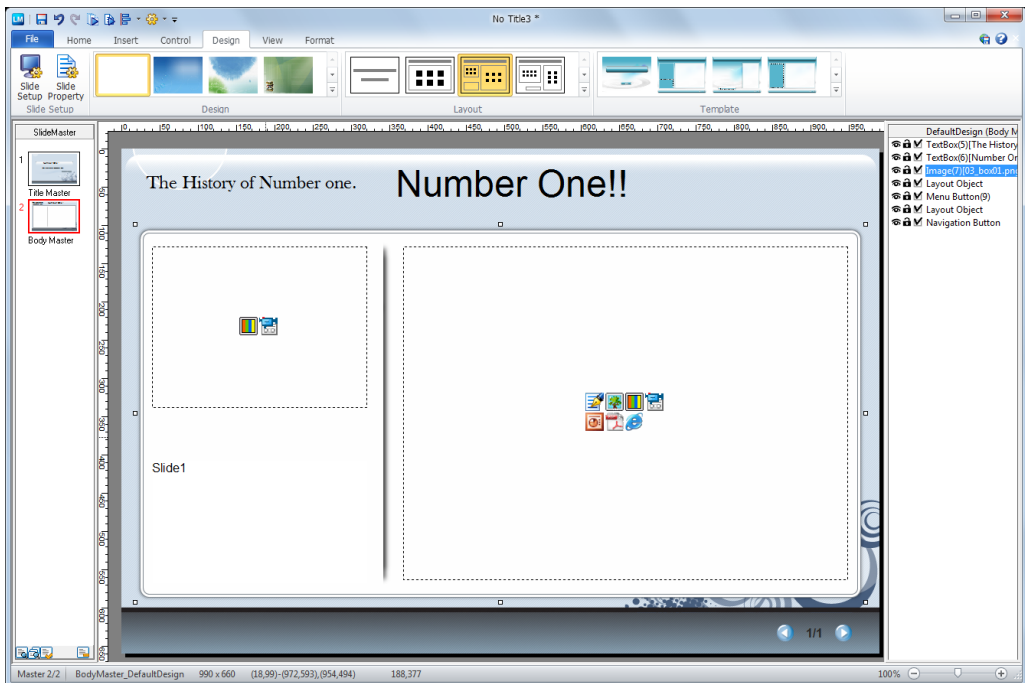

- ③ change the font in [Home]Tab - [Font].

④ on **[Body Master]**, add body master design with video and PowerPoint type template.

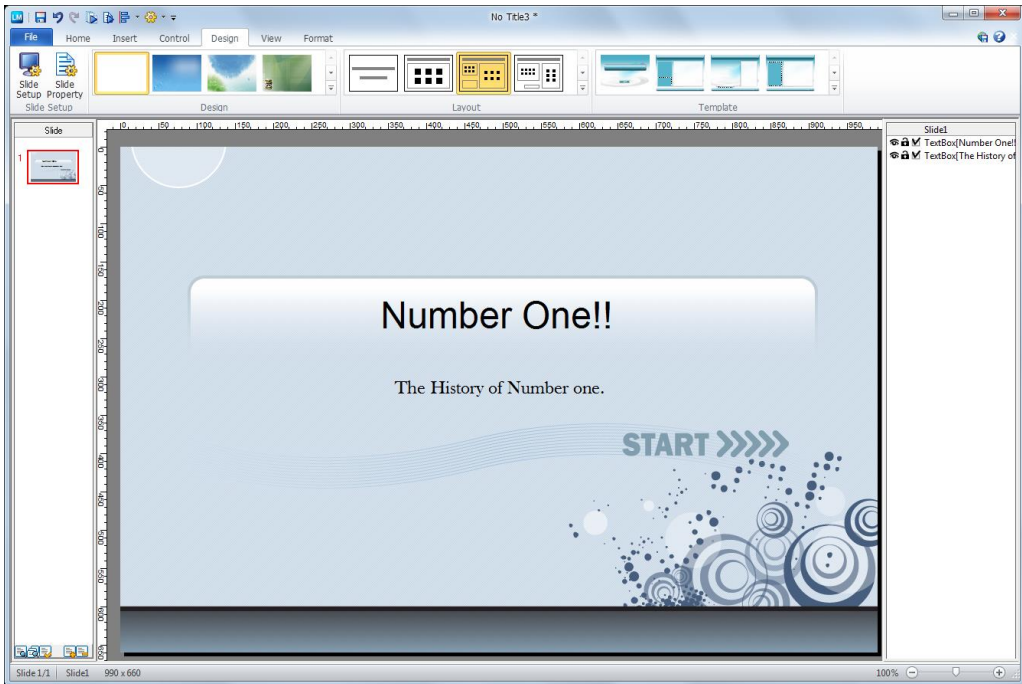

⑤ on **[Body Master]** enter text if you need.

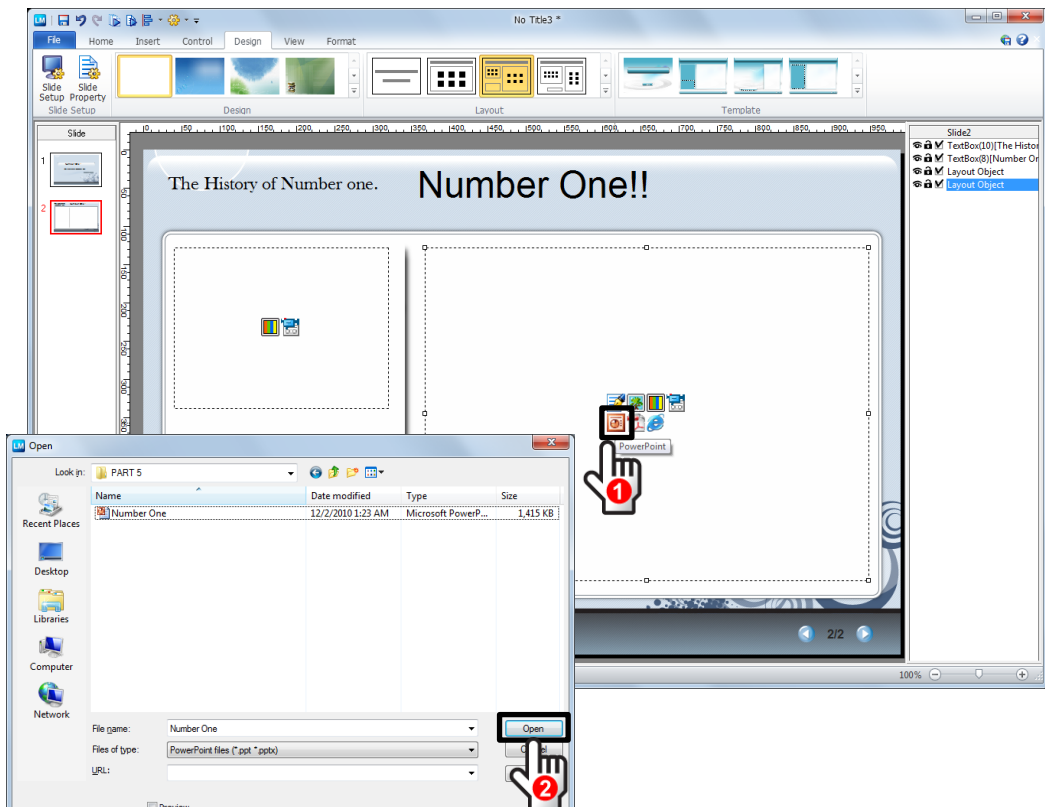

2 Insert PowerPoint & Video

◆ Insert PowerPoint

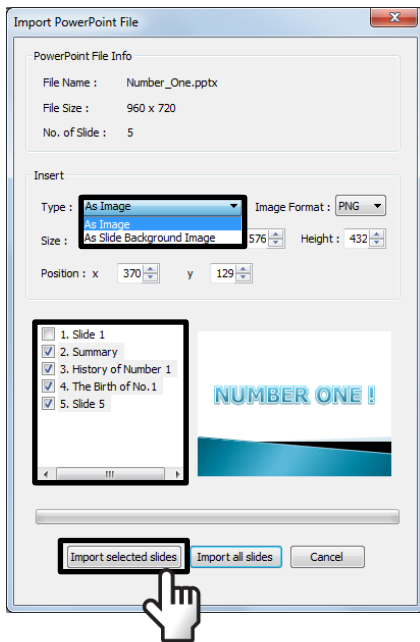

- ① click slide1, press the add new slide hot key, [Ctrl+M].

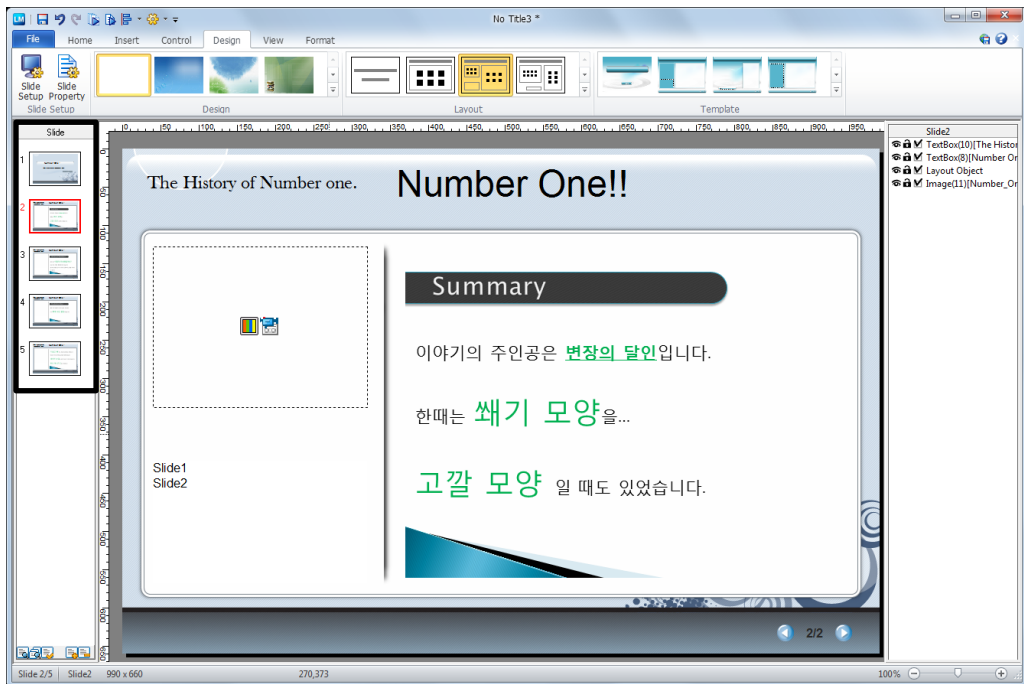

- ② on slide2, click PowerPoint icon and insert sample PowerPoint file 'PART 5\Number One.ppt'.

③ select insert PowerPoint type [As image] and choose PowerPoint slide 2 to 5 one and click Import selected slides.

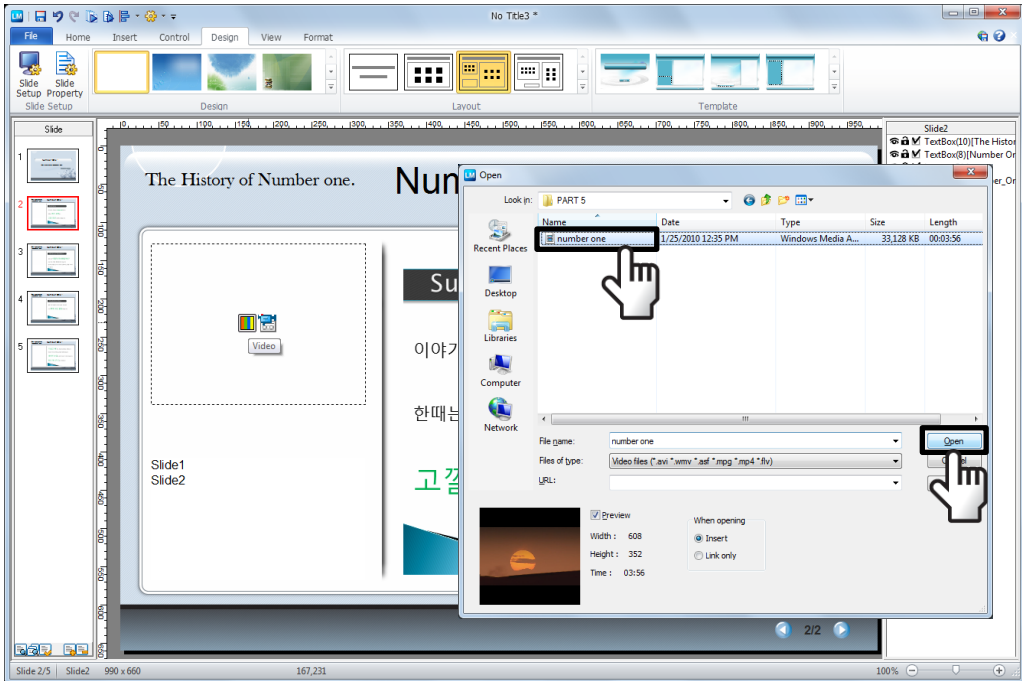

④ new LectureMAKER slide added as same number of inserted PowerPoint slide.

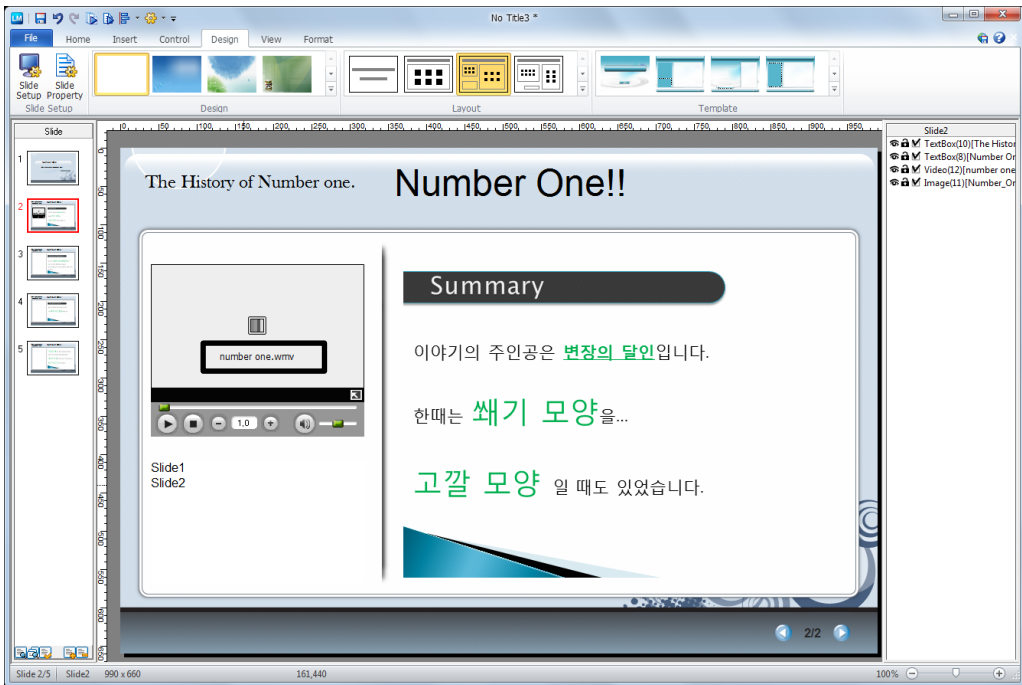

◆ Insert Video

- ① On slide 2, double-click video icon.
Find the sample video file 'PART 5\Number One.wmv' and insert.

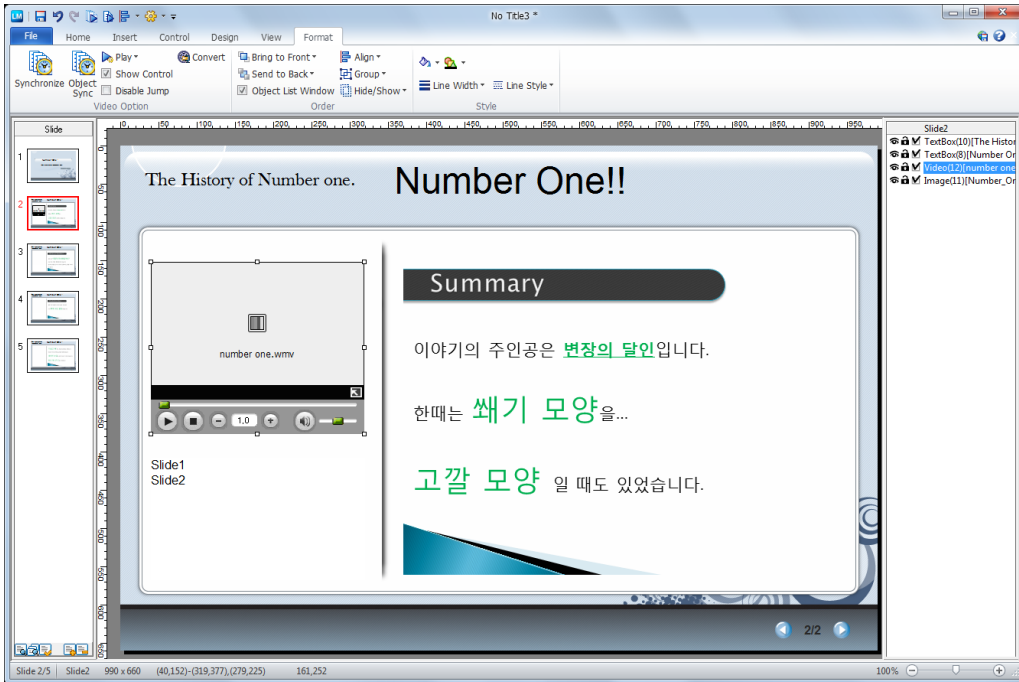

- ② when the video file inserted, the file name is shown and icon turned black-white.

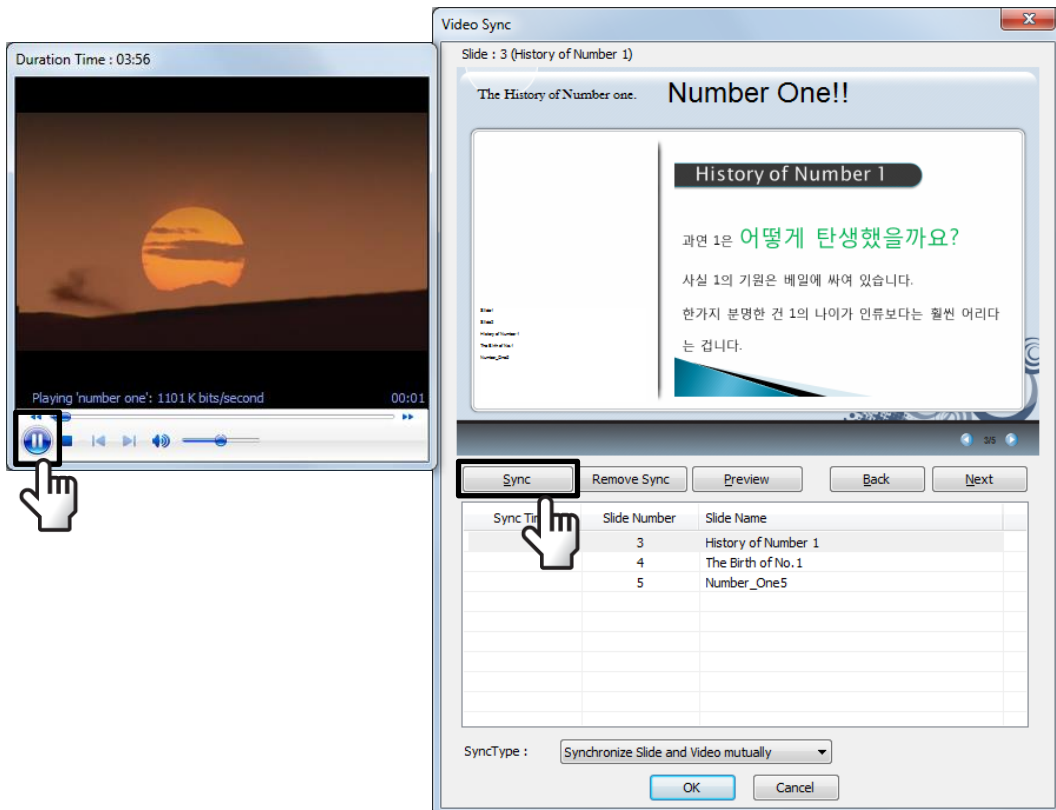

3 PowerPoint Synchronization

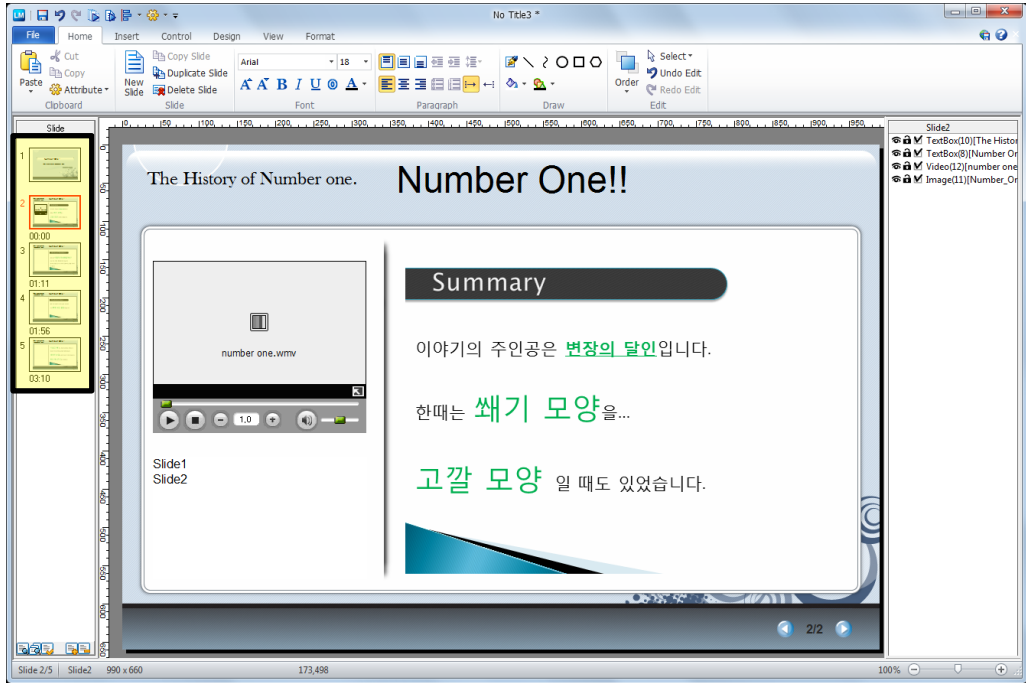

① double-click the inserted video, click  synchronize on [Format]Tab.

② In Video sync window, play the video file and click the Sync button.

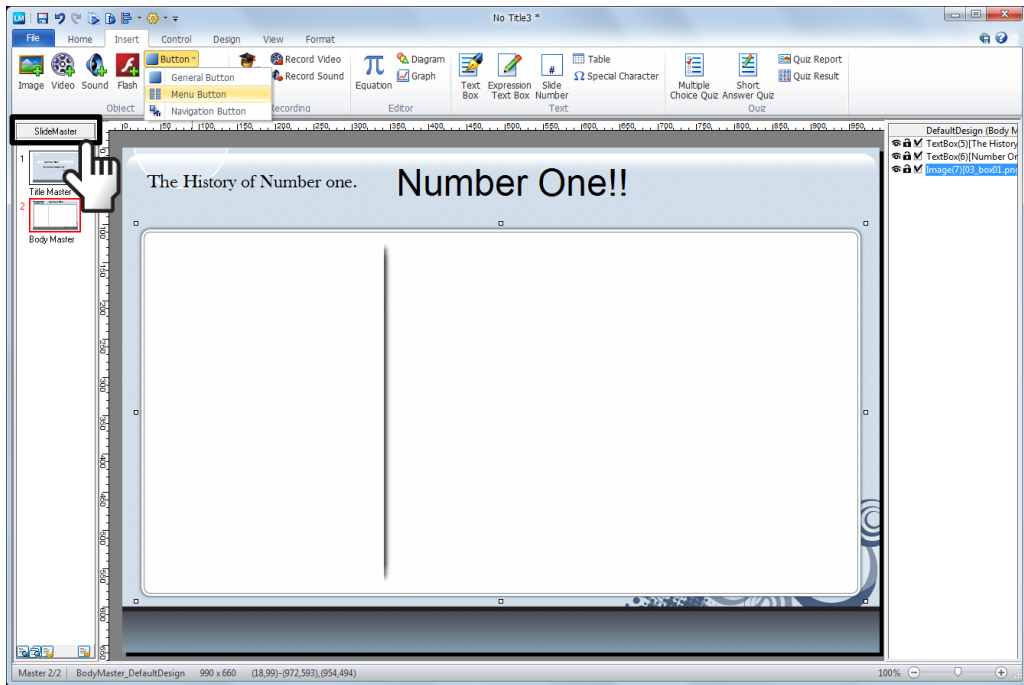

③ find the sync time below the each slide.

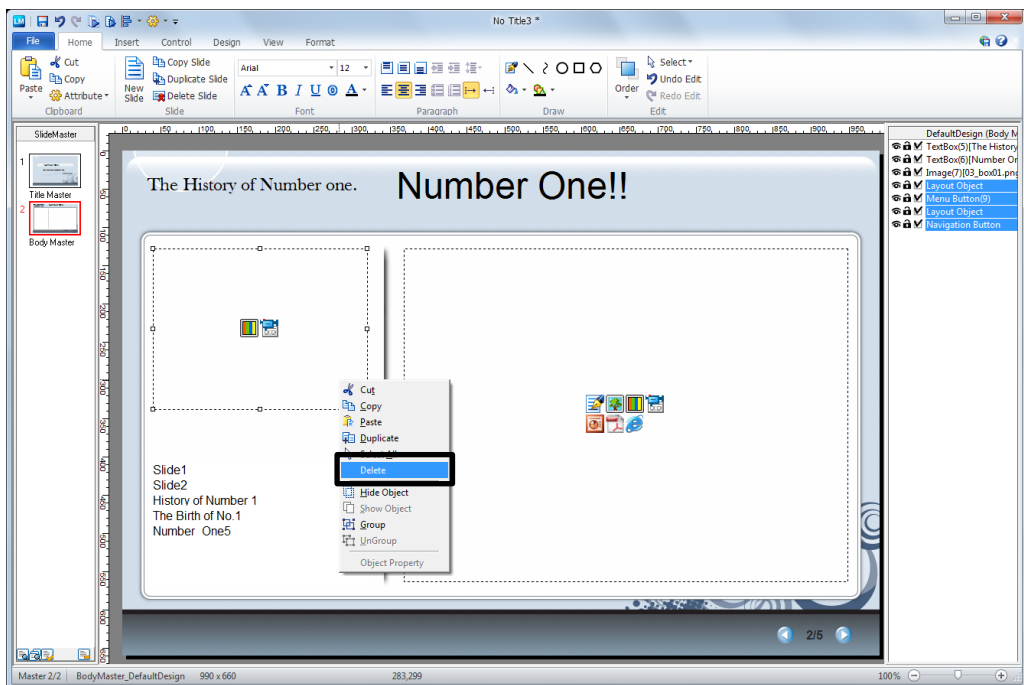

④ Synchronize is run by sync time or slide proceed.

4 Insert Menu Button

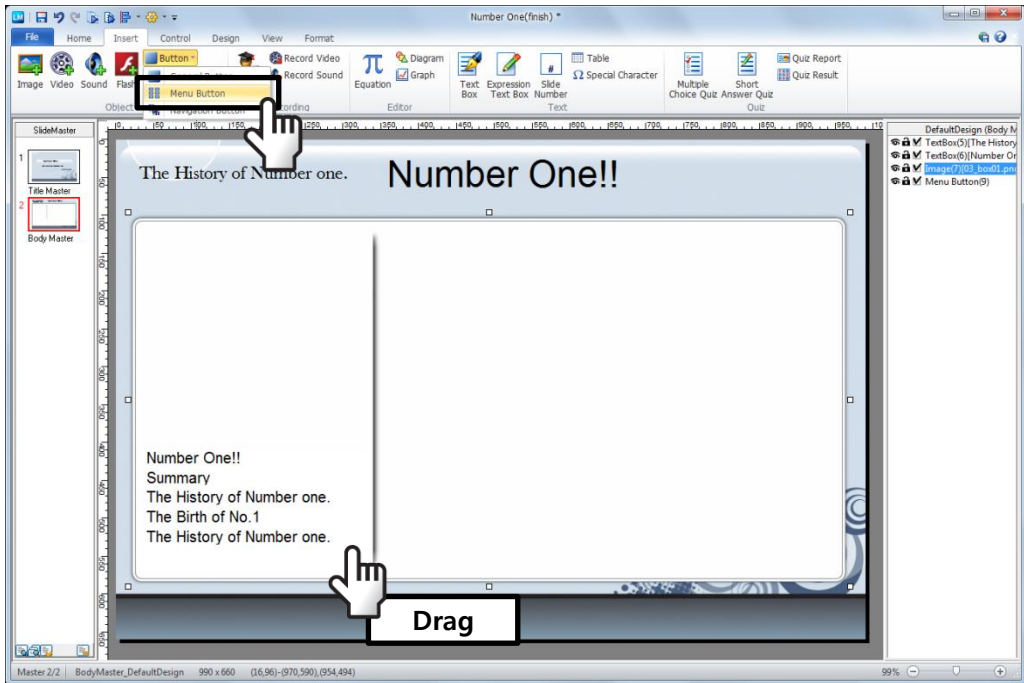

- ① Insert Menu button to all slides except slide 1.
Choose [Slide Master] – [Body Master].

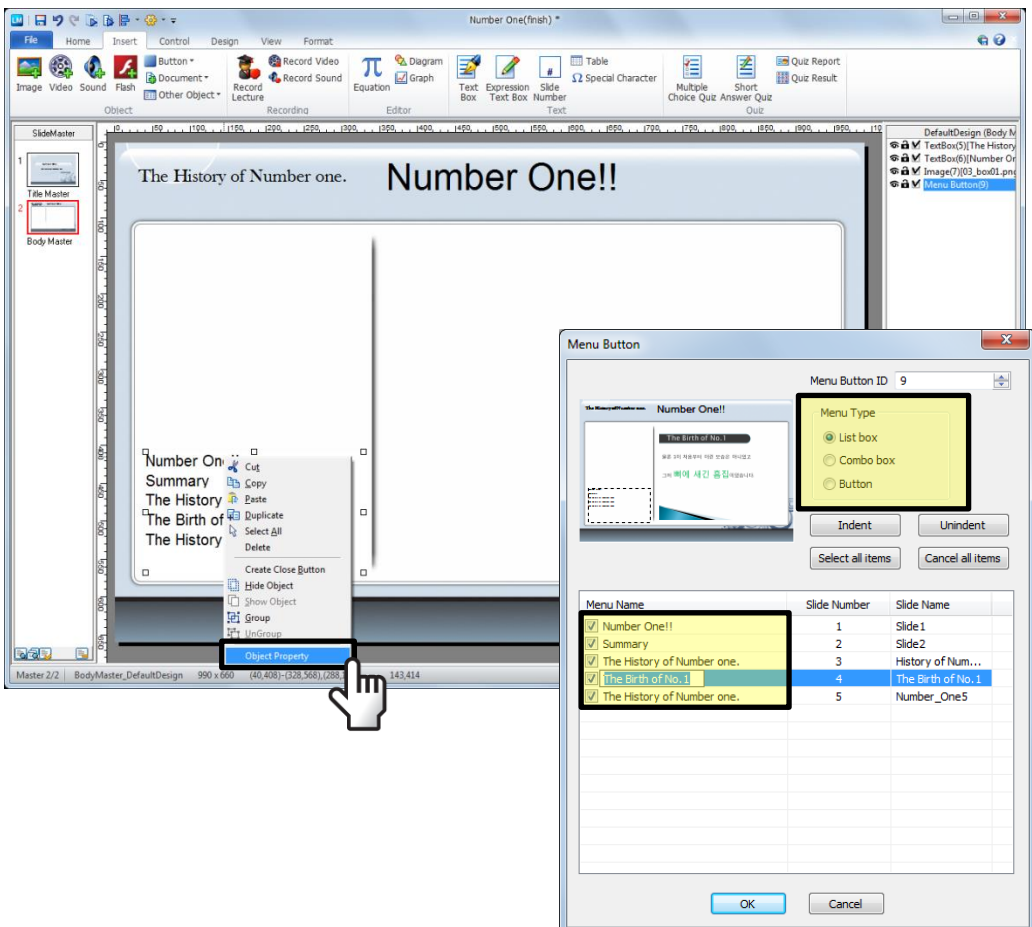

- ② Delete the default Object on body template.

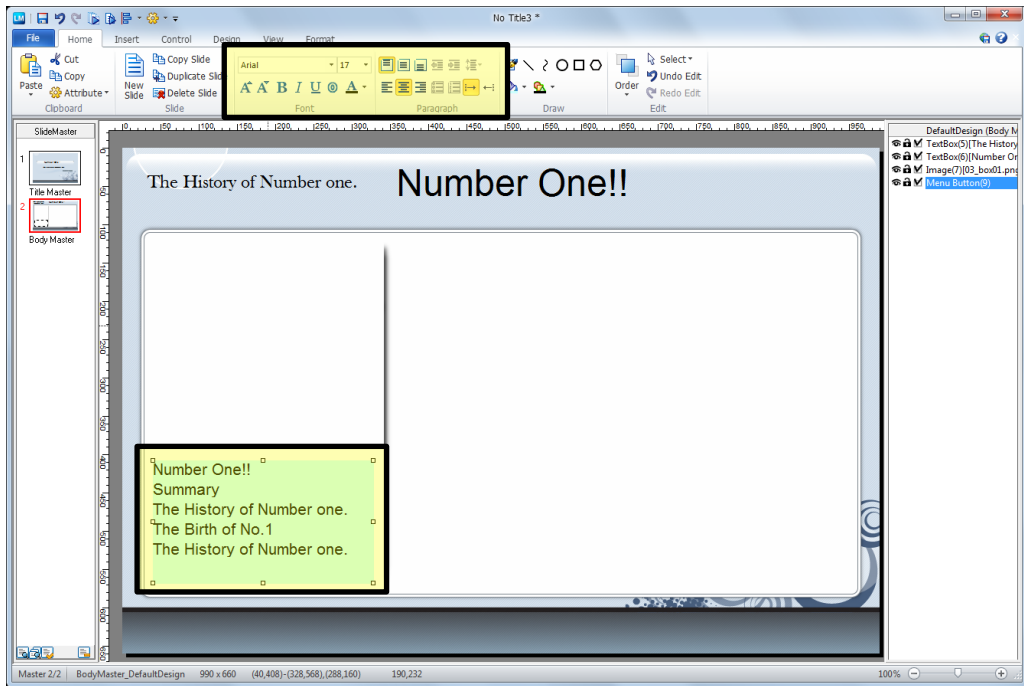

③ In [Insert]Tab click [Button]-[Menu Button], place the button area.

② there are 3 video control is appeared on the object list. Hide the each property object.

③ each property object is hidden.

④ match the a button and hidden video property, open button property and set when the button clicked: Show hidden object (Play icon- video play: play/ Pause icon- video play: pause / Stop icon- video play: stop)

⑤ [View]Tab – [Run Full Screen] or click F5 key for preview.

TV_01

TV_02

TV_03

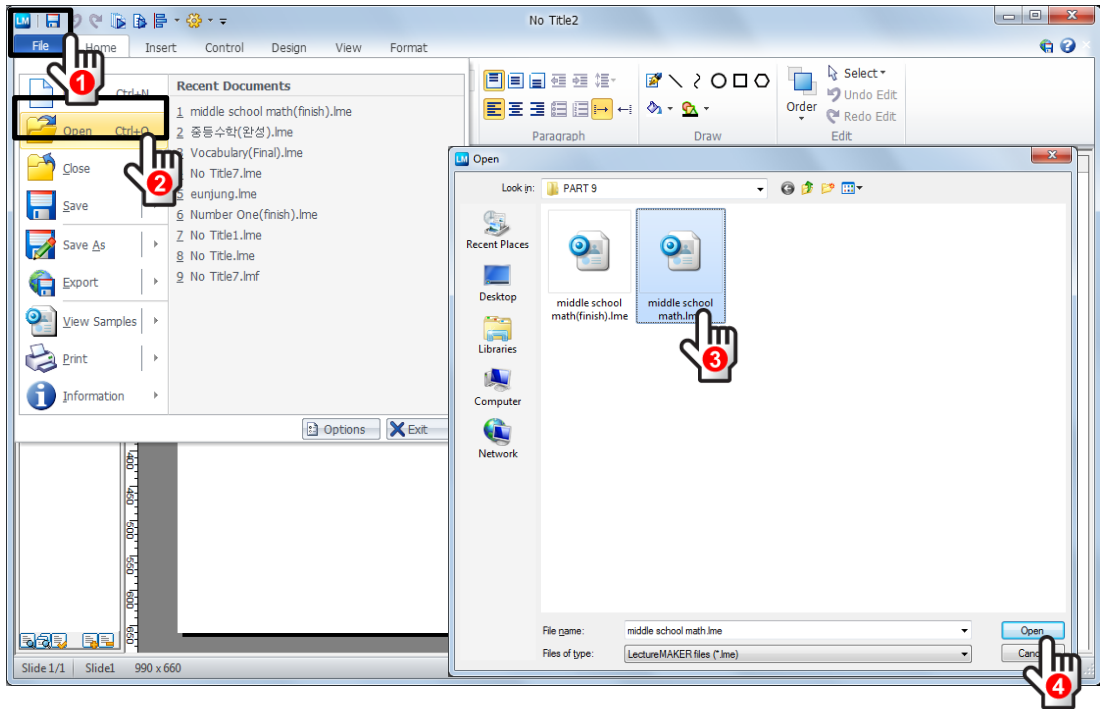

Remarks

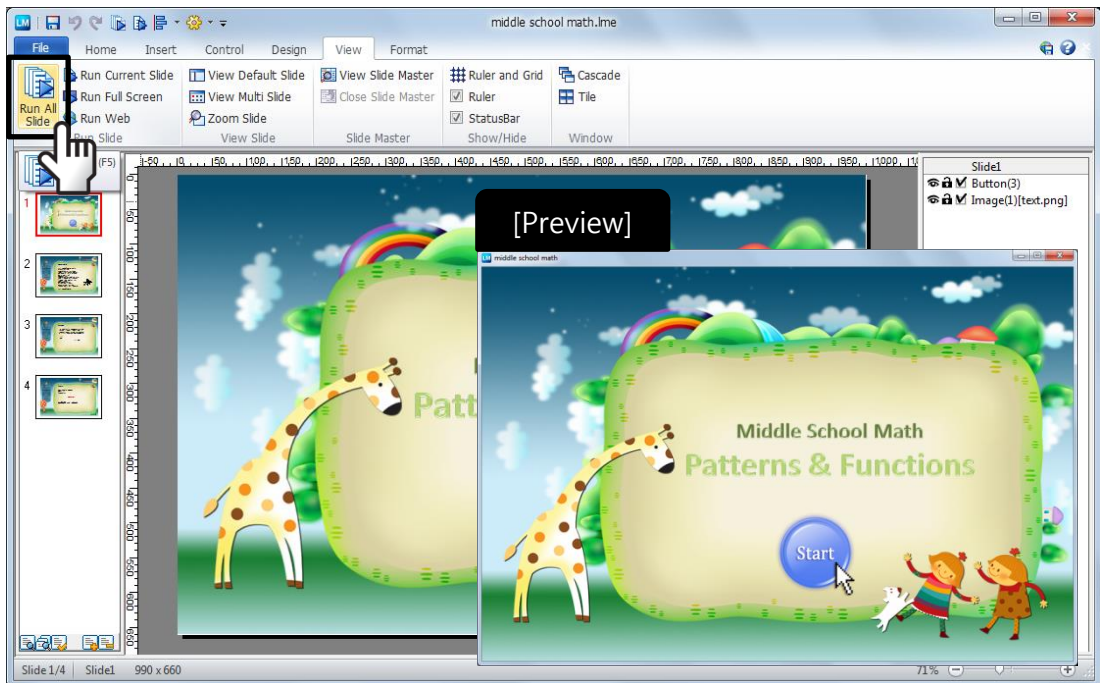

- multi play speed / Full Screen / Mute / Play repeat and etc.
- make your own video control button with various image.
- use video control to control audio object as well.

1 Open LectureMAKER content & Preview

① Run LectureMAKER, click [File]tab - Open sample LectureMAKER file 'PART 9\middle school math.lme'.

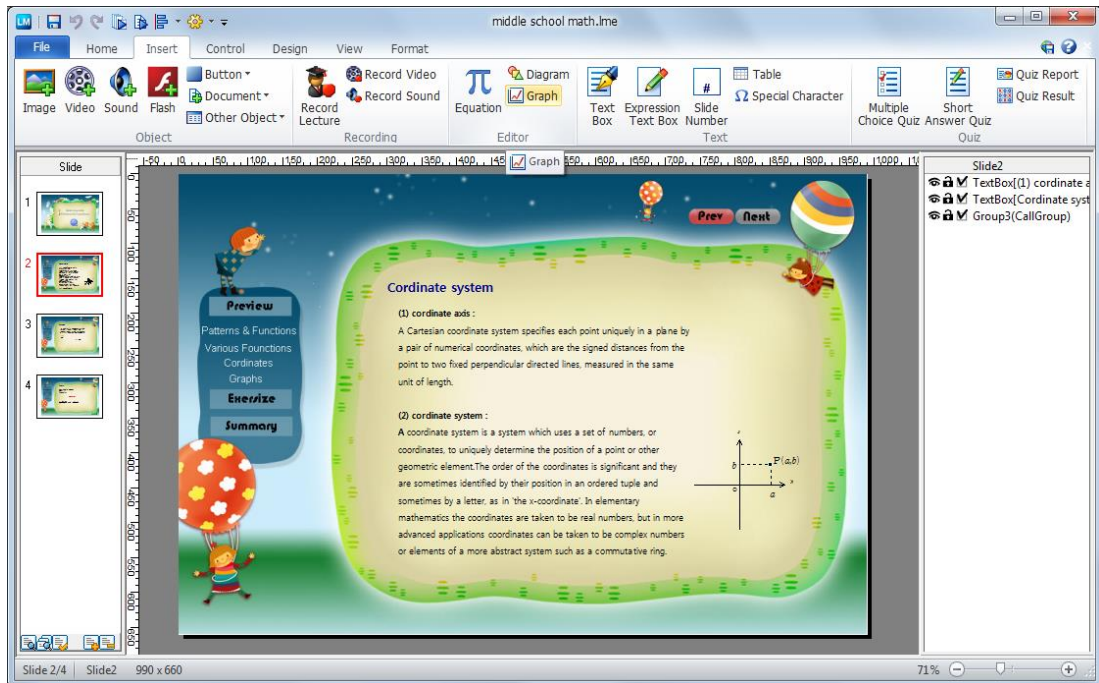

② check the content with preview the slide1 to 4. [View]Tab – [Run Full Screen] or click F5 key for preview.

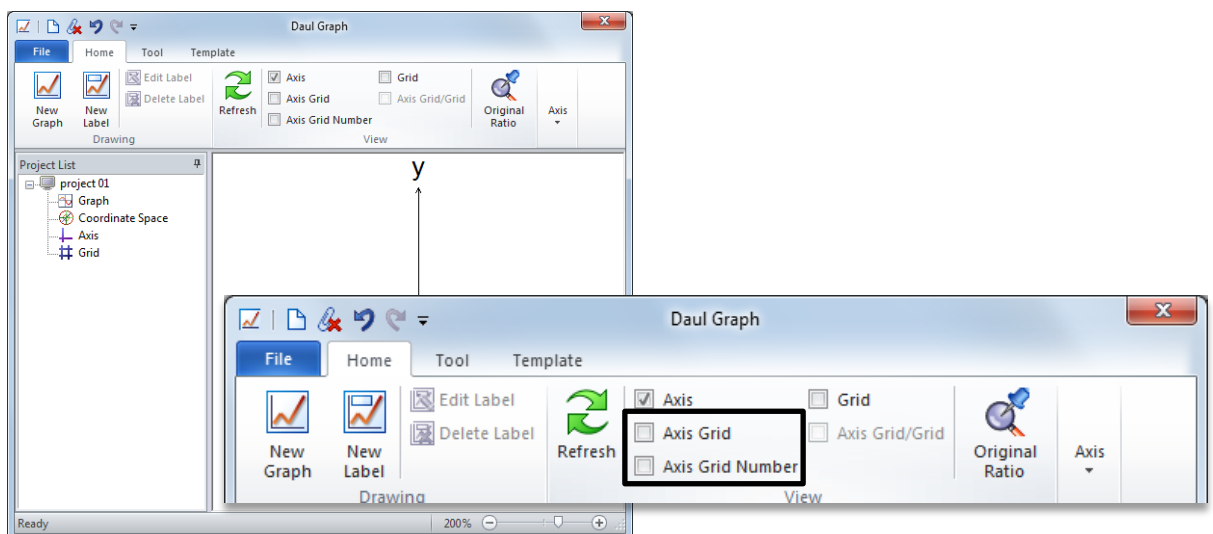

2 Insert Equation, Graph, Diagram

◆ Insert Graph①

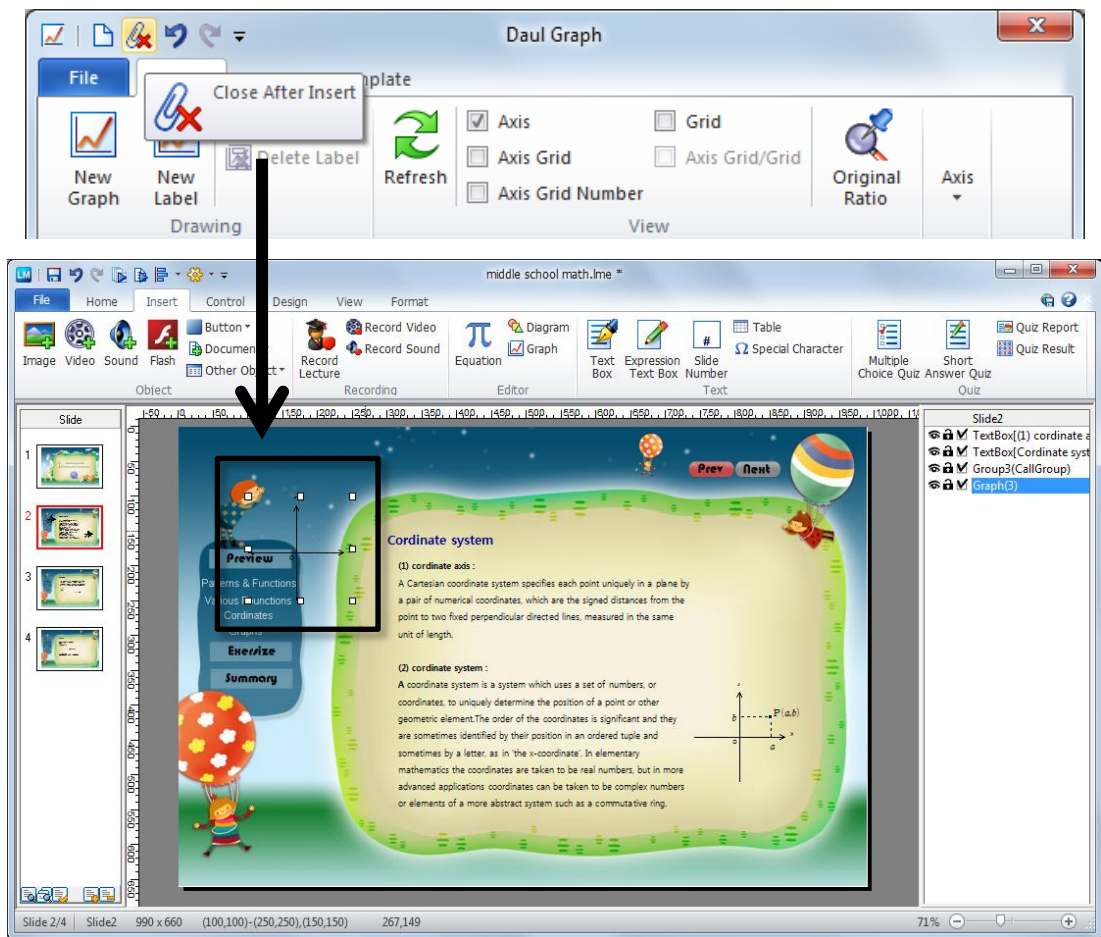

① Slide2, insert graph as right.
Click [Insert]Tab-[Graph]

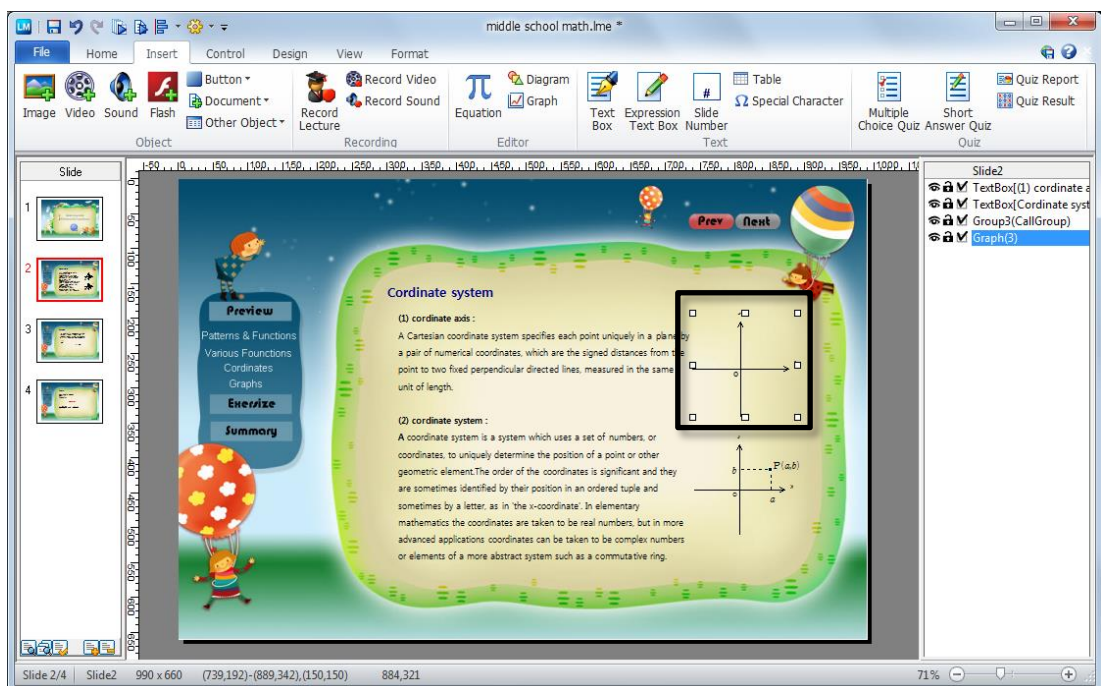

② Daul Graph editor is appeared.
un-check Axis Grid and Axis Grid Number.

③ click Close after Insert icon.

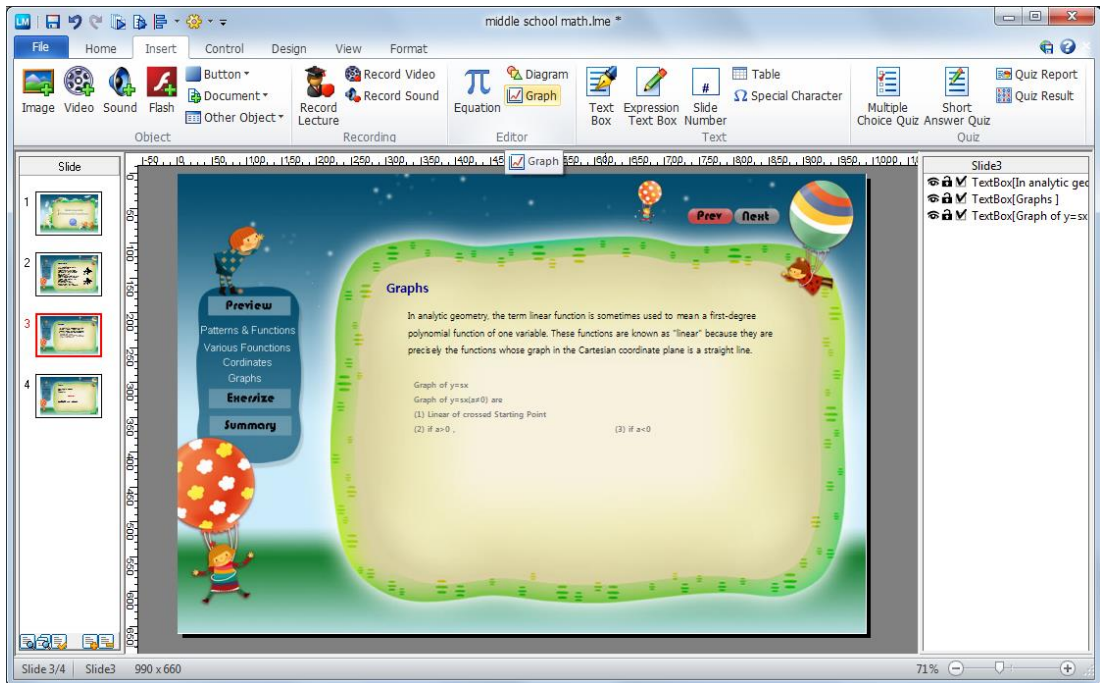

④ Drag and place the graph.

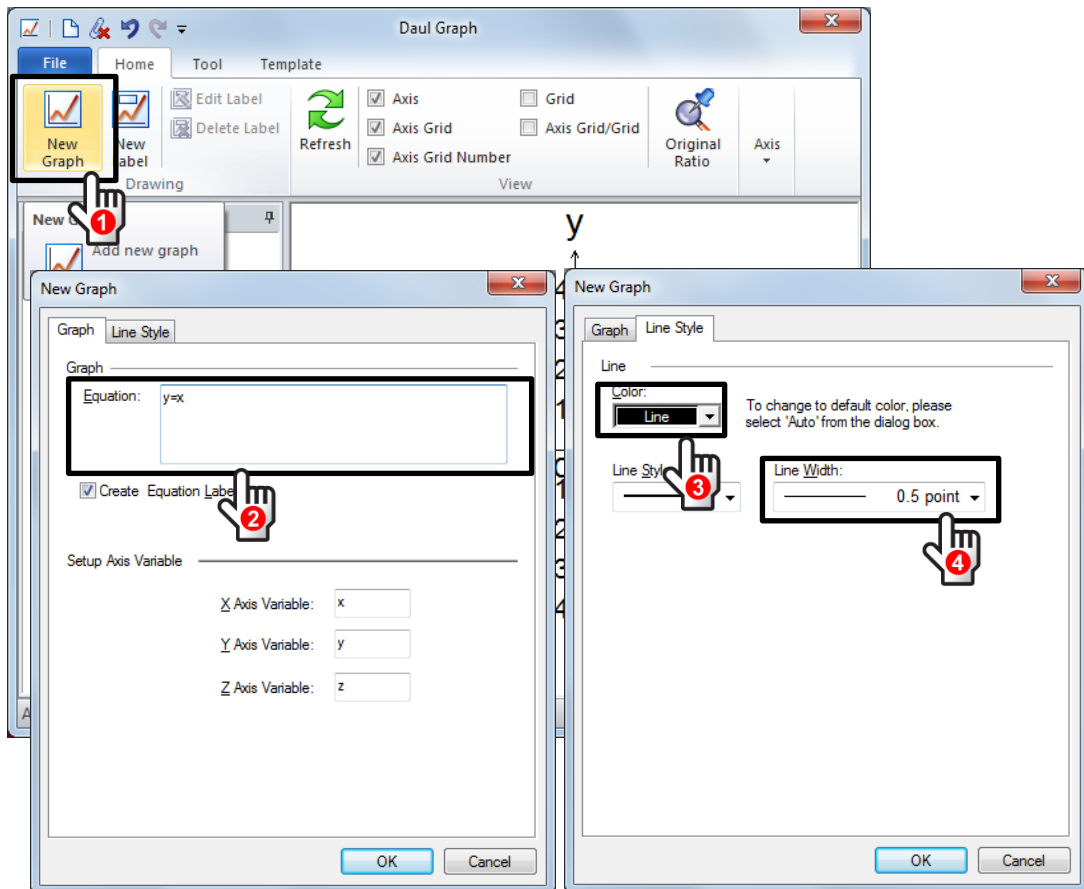

◆ Insert Graph ②

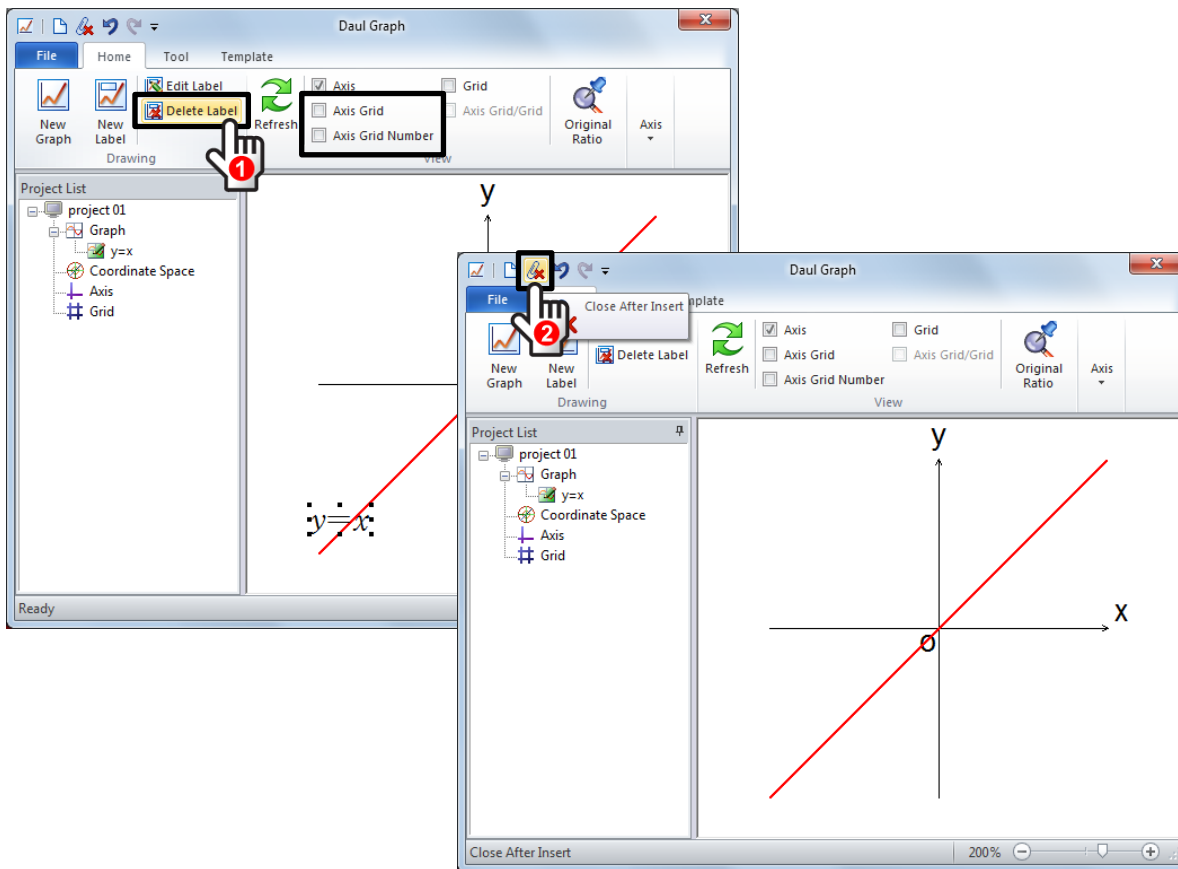

① on slide3, draw equation $y=x$ and graph $y=-x$.
Click and open Graph Editor.

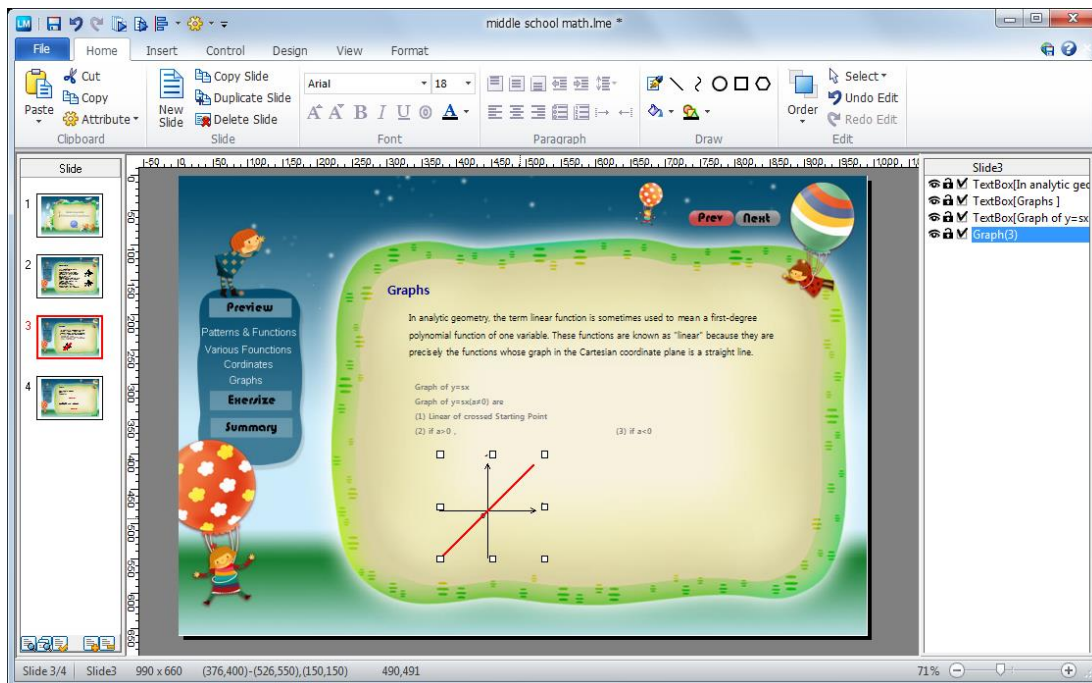

② Click [New Graph] and enter a equation $y=x$. Move to [Line Style] and choose line color, style and width.

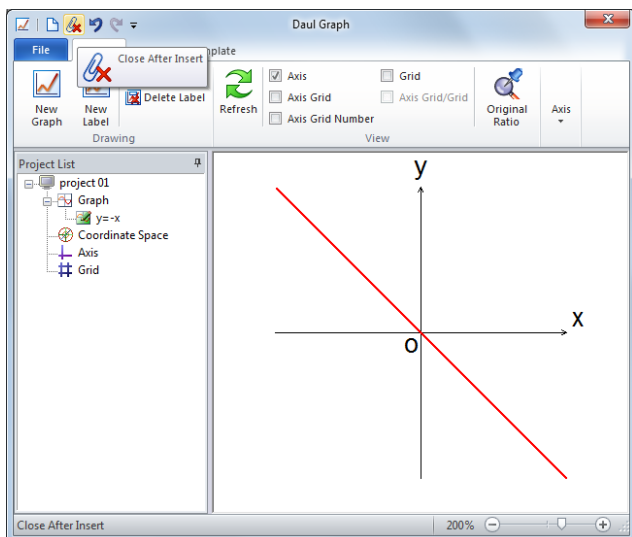

③ un-check Axis Grid and Grid Number. Click the equation(text) $y=x$ and delete it.

④ the graph is inserted.

⑤ draw $y = -x$.

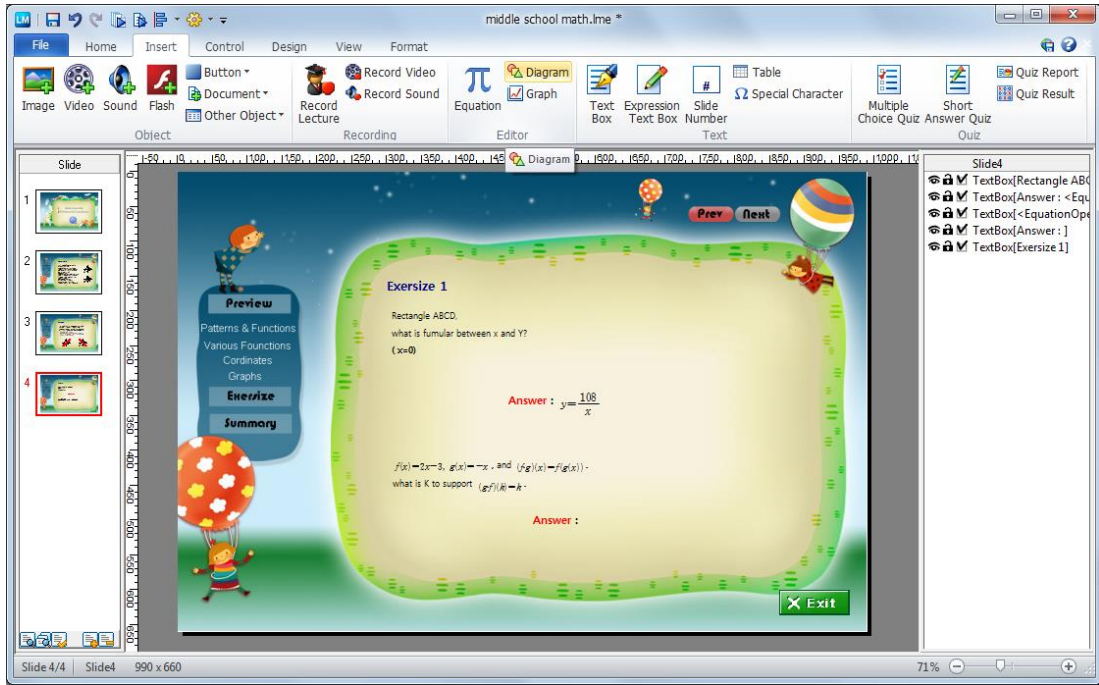

⑥ Two all graphs are inserted.

Remarks

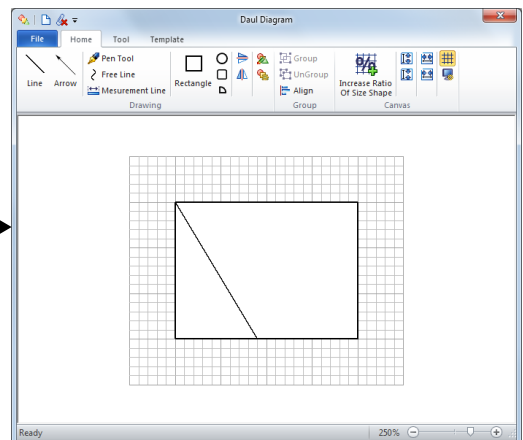

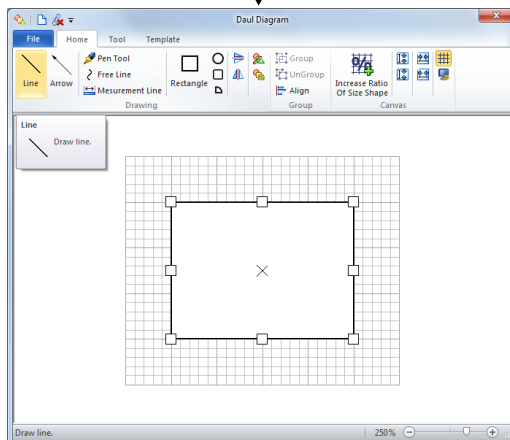

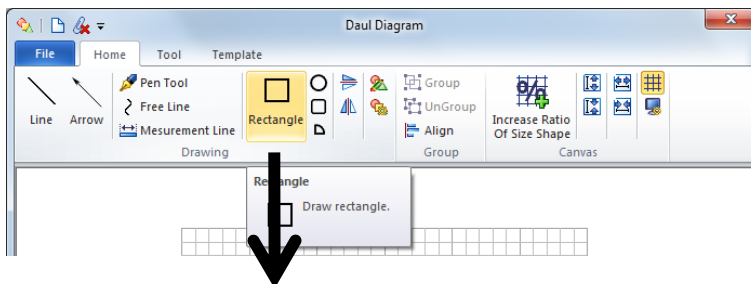

- when draw a graph, use equation editor and copy it.

◆ Insert Diagram

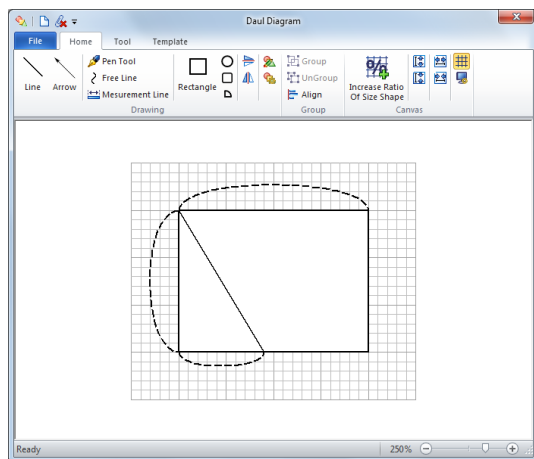

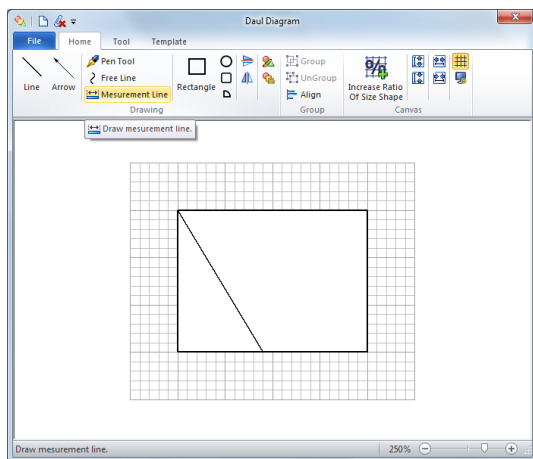

- ① On slide4, draw a diagram as right side.
Click [Insert]Tab and open Diagram Editor

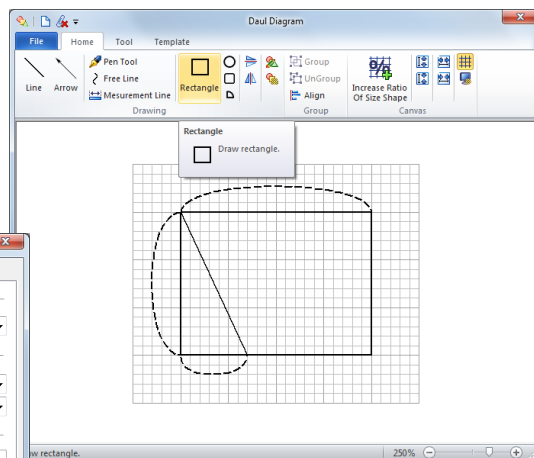

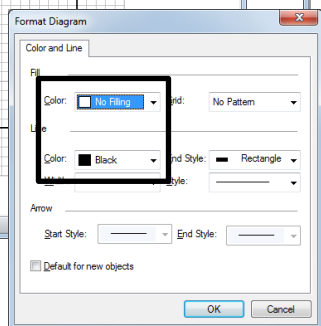

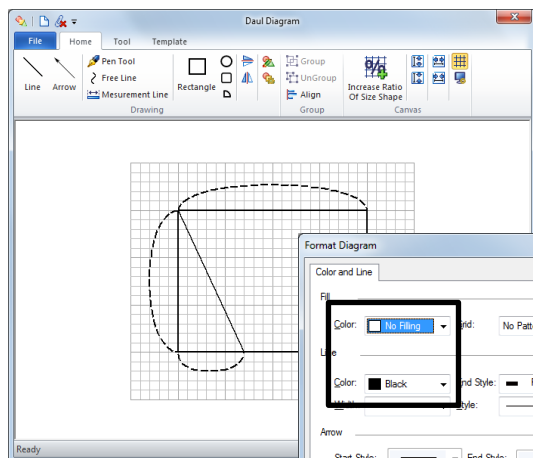

- ② In Daul Diagram editor, click Rectangle and place the cursor and drag.
click Line and place the cursor and drag to draw diagonal line in the rectangle.

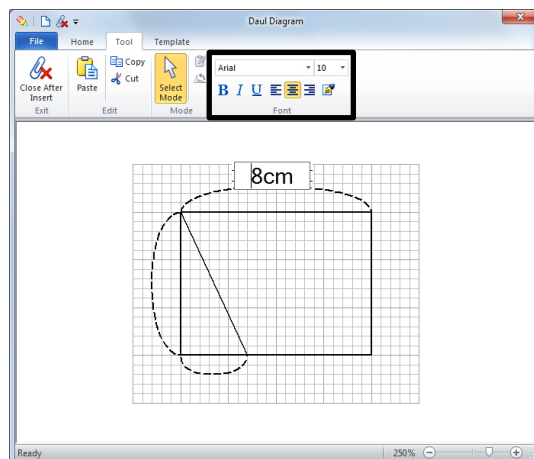

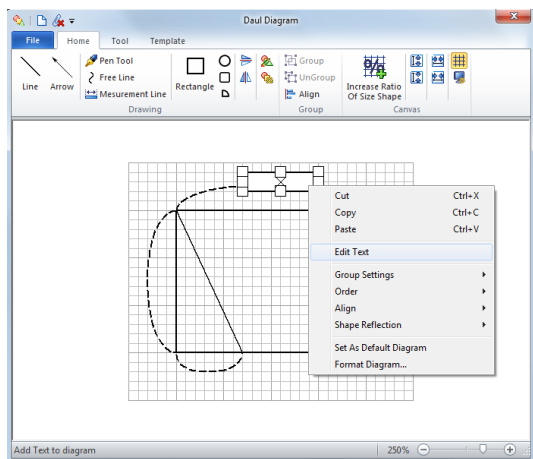

③ Click Measurement Line, drag the lines as below.

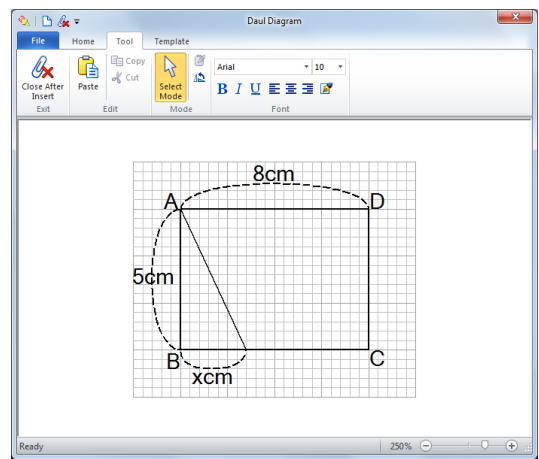

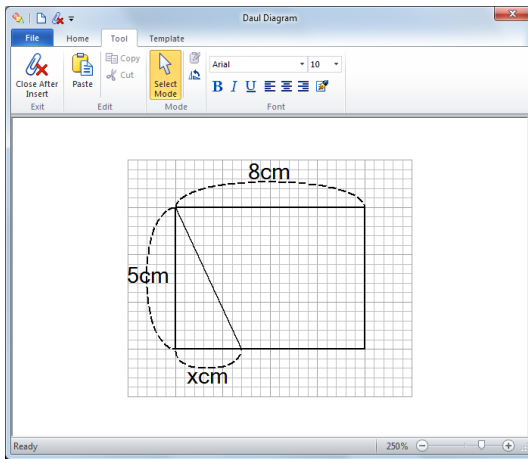

④ Click and draw another rectangle and place it over the measurement line. Right-click and open Format Diagram. Fill: No Filling and Line: Black

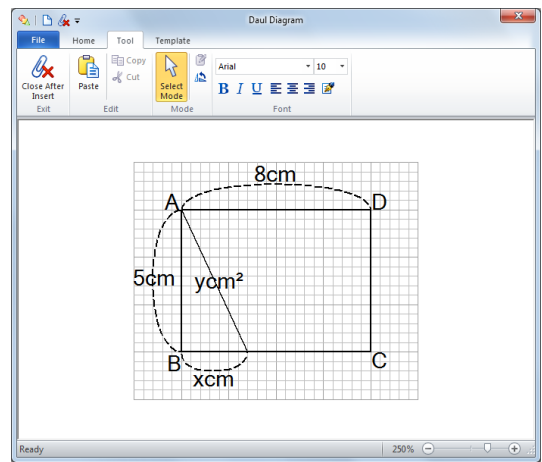

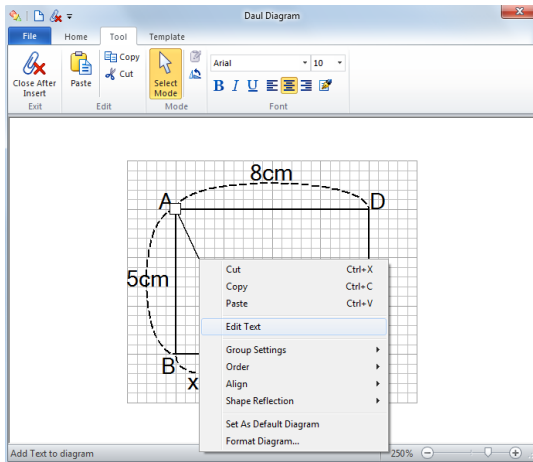

⑤ click the rectangle, right-click and select [Text Edit], enter '8cm'. change the text font, style and size on [Tool]Tab – [String].

⑥ enter the other measurement line and number: 5cm, x cm.
Add vertices: A,B,C, D and P.

⑦ Click the straight line and click [Edit Text] on [Tool]Tab or right-click.

⑧ click [Close after Insert icon].

Remarks

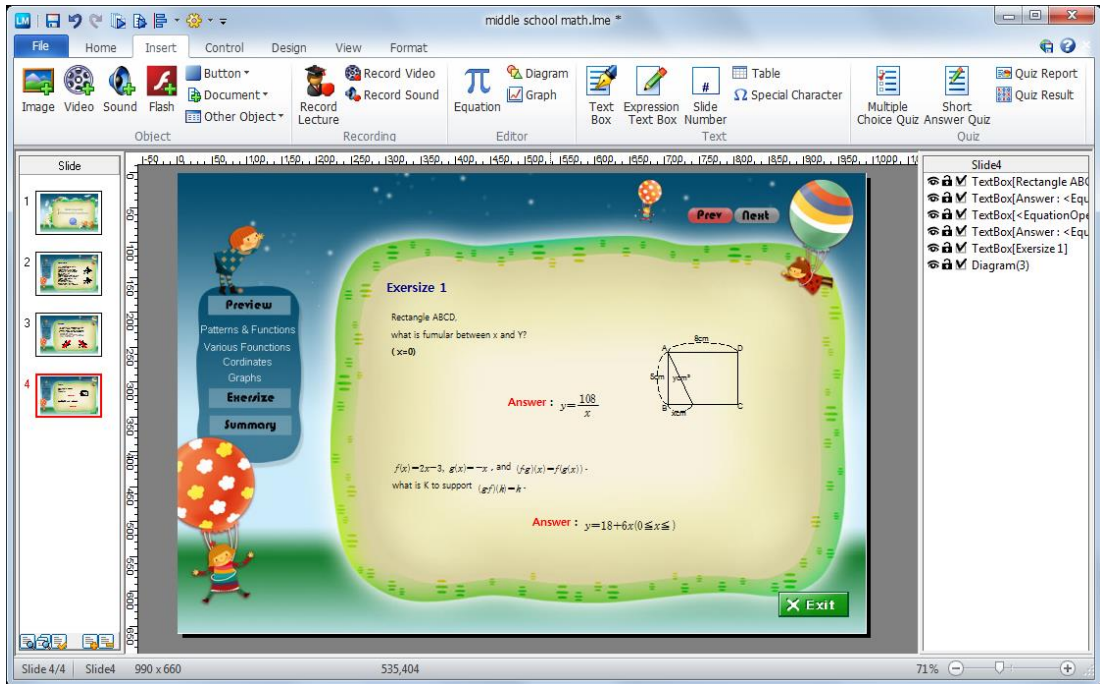

- when insert a diagram, a diagram must be in the gridded canvas.
use the [Canvas]Group icon to size up& down.

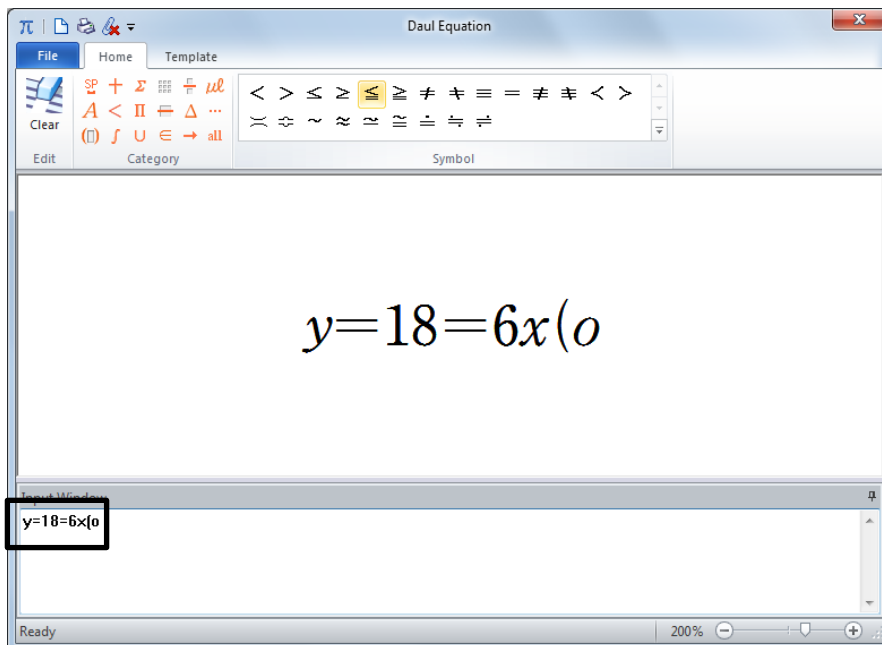

◆ Insert Equation

① On slide6, insert numerical equation. Click [Insert]Tab – [Equation].

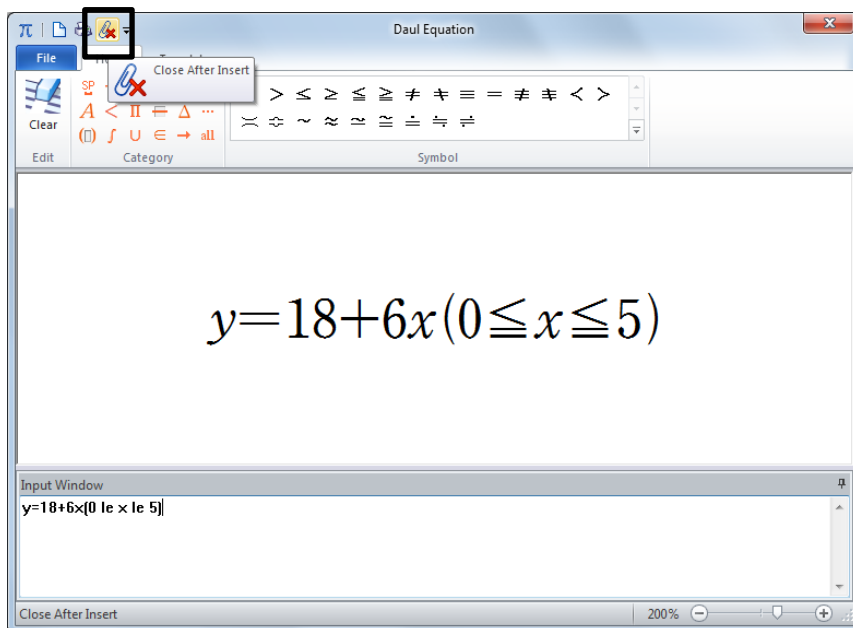

e.g.) $y = 18 + 6x$
($0 \leq x \leq 5$)

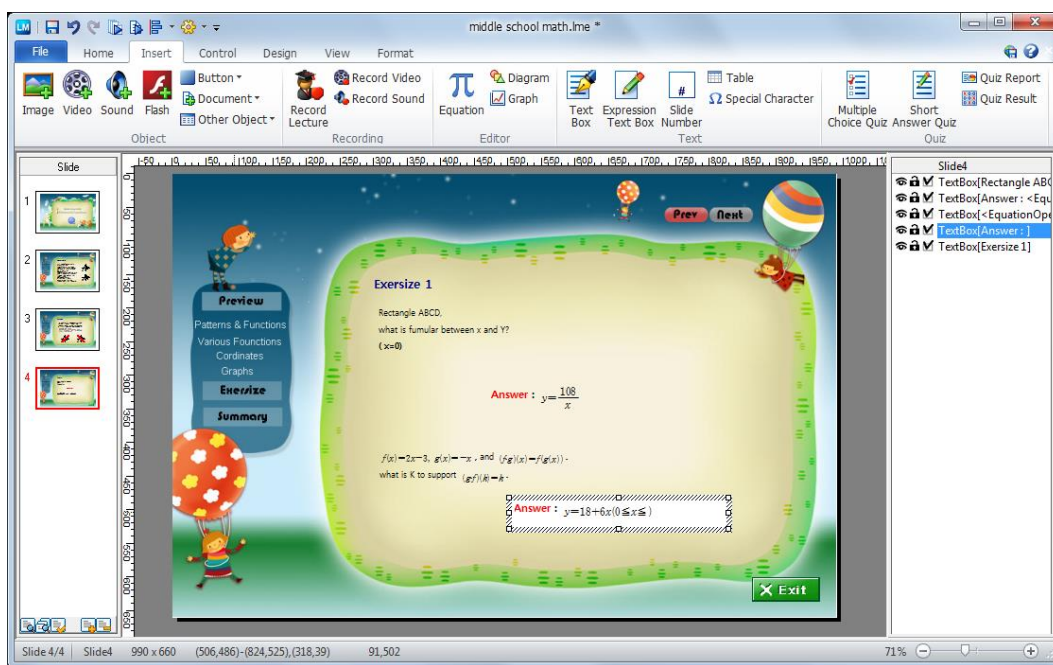

② enter the equation character and numbers in Input Window or choose it from Category group and symbol group.

③ click Close after Insert.

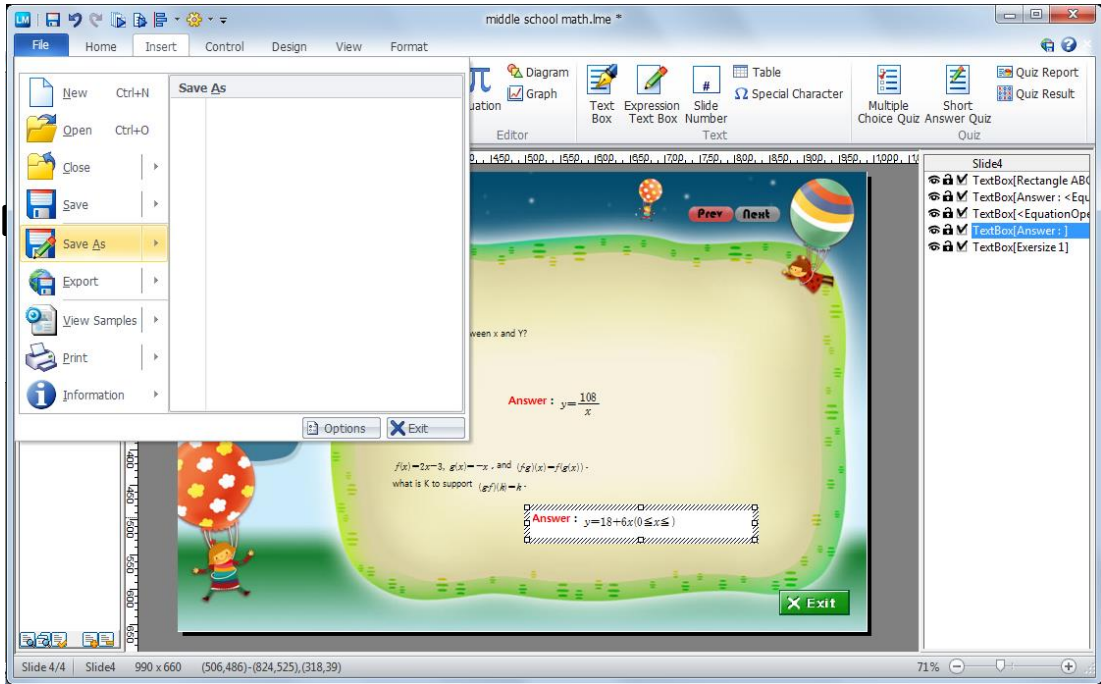

④ the numerical equation is inserted.

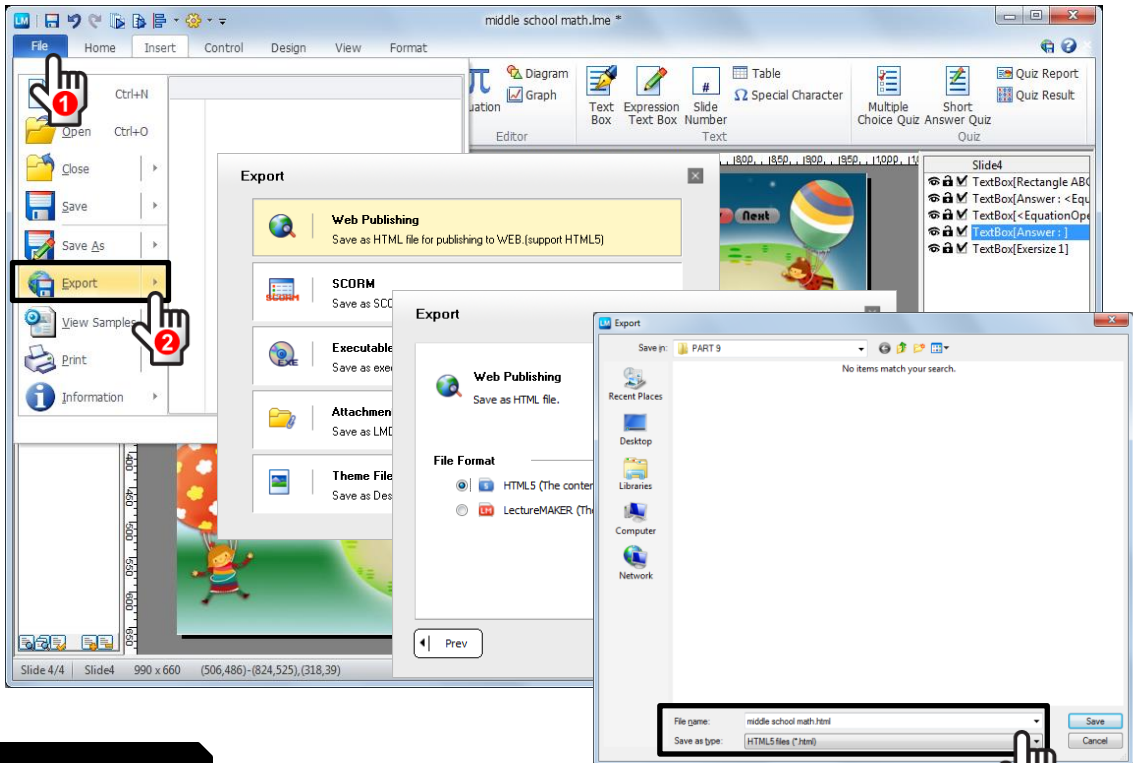

3 Save As

- 1 Click [File] Tab and and Save As.

- 2 Click [File] Tab and click to [Export] – [Web Publishing]

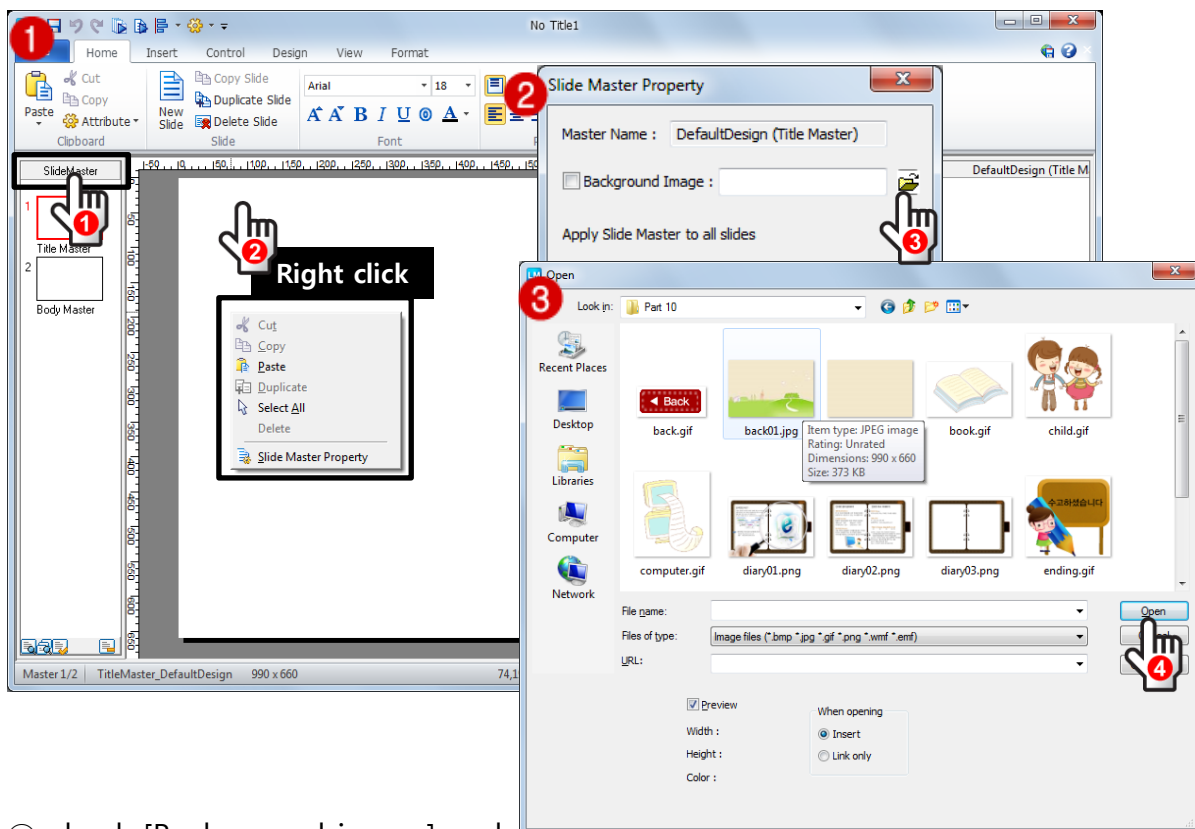

Remarks
